Title IX

Sexual harassment is illegal and runs counter to the objectives of Wichita State University. When people -- whether students, faculty or staff -- feel coerced, threatened, intimidated or otherwise pressured by others into granting sexual favors, their academic and work performance is likely to suffer. Such actions violate not only the dignity of the individual but also the integrity of the university as an institution for learning.

Title IX forbids sexual harassment and sex discrimination and holds all members of the university community responsible for promoting a positive working and learning environment. At WSU, all persons are free to discuss any problems or questions they may have concerning sexual harassment at the university without fear of intimidation or retaliation.
