ProctorU uses a two-factor ID verification by having the student: (1) show a government-issued ID shown to the live proctor before the test, and (2) use the same system that large corporations and banks use where students provide correct answers to a set of questions taken from public information databases. This second factor only works for students who have information in U.S. public databases.

If a student is unable to authenticate, ProctorU will not allow the student to continue with the exam. The student can reschedule at a time when they are able to verify their ID via government-issued ID at the minimum.
