Course Schedule Search

This course search can be used to query the offerings of Wichita State University for the selected term. **This search is not connected to the registration system. User should record the CRN of courses in which you are interested so they can be entered in the registration system.** Students can also still use the Banner search inside the secure *myWSU* portal.

- Your search can be narrowed by your selections of the various options on the left side of the screen. **Most searches require at least one subject to be selected.**
- Searches that can be done without a Subject filter are General Education Level, Course Number, Course Attributes and Class Start Time.
- Closed classes are indicated by "Seats Still Available: 0" in red. Classes using automated waitlisting will have a "Waitlist Maximum" of more than 0. See the [waitlisting page](#) for more information on that process.
- Search results will be sorted by Subject and then Course Number. You can change the result sort order to Course Number and then Subject in the drop-down.
- For best performance, clear all filters between searches. When using **All Subjects**, select your other filter options first; result will load more slowly using All Subjects.
- You may also search for courses by entering keywords commonly found in the course title (i.e. intro lab). The Keywords Title Search box is located after the filters. These searches are not case sensitive and must not contain special characters (i.e. # % \$ +).

Narrow Your Choices

A Subject must be selected, however, results return faster when fewer subjects are selected. Using the ALL Subjects may take longer for results to load.
