Restrooms and Other Facilities

Single-occupancy Restrooms, Baby Changing Stations and Lactation Rooms

Single-occupancy restrooms are facilities that can be used by all gender identities and expressions. These restrooms can benefit many different people including those assisting persons requiring an attendant, parents with differently gendered children, transgender and gender nonconforming persons. In particular, single-occupancy restrooms are a way to provide a safer space for trans and gender nonconforming students, faculty, staff and community members of Wichita State University. Additionally, these restrooms may be handicap-accessible and equipped with baby changing stations. There are also multiple lactation rooms available to the public, in which a lactating mother can utilize in private.
