

Icy Weather Forces Change In Shocker Campus Capers

Spring in Wichita means more than fever for fun as prevailed last Thursday when Co-eds donned shorts and swim suits in the balmy weather, for in less than 24 hours heavy coats and fur lined boots were in vogue and the fun fever had turned to chills.

The blizzard that swept into the State last Friday morning and waxed worse and worse brought attendance records down with every hour.

Dr. Amy G. Gerling, associate professor of sociology said that approximately 90 per cent of her 9 o'clock class was present but the class following this one dropped to 75 per cent.

A similar report was found to be true in several other colleges throughout the University. Many students who live in neighboring cities left early in the day for fear they would not be able to reach home later.

John Gaddis, superintendent of Buildings and Grounds said the University was forced to use standby fuel Friday and Saturday.

He said that this is the first time in several years that standby fuel has been used twice in the same season.

The meeting of the Kansas Association of Teachers of history and related fields, which was scheduled

to be held in the Commons Lounge last Friday and Saturday was postponed because of the weather conditions.

Dr. John Rydjord, dean of the Graduate School, said the meeting has been rescheduled for April 15 and 16.

KANSAS WEATHER? It's unpredictable. Thursday with temperatures in the mid 50's these dorm coeds decided to absorb some good Kansas sunshine in the sundeck of Grace Wilkie Hall unsuspecting of the next day's blizzard. Enjoying the sunshine while it lasted were Linda VanFalkenberg, Betty Binter, Karlene Smith, and Pat Kennedy. Only 24 hours later Venita McFadden and Marlene Brown were caught battling the wind and snow of Friday's blizzard, the worst on record of that date.

Adult Education Adds Courses In Meteorology

The College of Adult Education, according to Dean T. Reese Marsh, has completed a contract with the Air-Reserve Center in Wichita to provide instructor services for two Air Force Reserve specialized training courses in meteorology. It will be the first increment in a flight operations course for Air Reserve Officers.

The instructor who has been employed through the College of Adult Education to teach these courses is Carl R. Hamilton, a lieutenant colonel in the Air Force Reserve, Dr. Marsh said.

Mr. Hamilton has had five years experience as a practicing meteorologist, while on active duty with the United States Air Force, Dr. Marsh said.

He is at present employed as an air craft design engineer at Boeing Airplane Company in Wichita.

Each course will consist of 48 hours of instruction during 24 two hour periods which meet twice monthly for 12 months, he said.

Classes which began on March 22, are being held at the Wichita Air Reserve Center, 820 W. Second Street, Dr. Marsh said.

Freshman Awarded Phi Mu Scholarship

A scholarship award to be applied toward his tuition was recently given to Don Jaeger, freshman in the School of Music, by Phi Mu Alpha Sinfonia, music fraternity.

Several freshman and sophomore music students entered the competition for the fraternity's award. Jaeger won with his rendition of Van Williams' "Oboe Concerto".

Jaeger is a member of the University Symphony Orchestra and Band, and the Wichita Symphony.

To Hold Egg Roll for Logo

An Easter egg roll for approximately 175 children and adults of the Institute of Logopedics will be held April 7, about 2 p.m. on the grounds in front of the Commons Building.

The annual event is sponsored by the Air Force with Cadets Maj. Dean Sutcliffe and Capt. Floyd Farha in charge. Those attending will receive Easter eggs, baskets, and ice cream and cakes, contributed by local firms, according to Capt. Robert L. Goss, commandant of the cadets.

"The whole thing is being made possible through the voluntary contributions of the cadets corps," Captain Goss said.

Cooling Unit To Be Placed In Library

A 60-ton Carrier air conditioning unit will be installed in the Morrison Library this spring according to John Gaddis, superintendent of Buildings and Grounds.

The Board of Regents has allocated \$12,000 for the unit which is to be installed by Shelley Electric Company by May 14.

The unit will be more than sufficient to air condition the complete building, Mr. Gaddis said.

Pre-Registration Process Revamped for Fall Term

(See related article on Page 4.)

Inauguration of a new voluntary pre-registration plan designed to guarantee classes and class hours to University students next semester was announced jointly Friday by Dr. James K. Sours, director of Student Services, and Dr. Worth A. Fletcher, registrar.

The new plan will take effect April 11 and pre-registration will continue through April 29, they said. Students currently enrolled who plan to return to the campus in September are eligible to participate in pre-registration.

In addition to guaranteeing classes and class hours to students, the new plan will probably simplify the enrollment during registration week next fall, Dr. Fletcher said.

Another advantage cited by the administrators is that working students will be able to arrange their employment schedule with employers much earlier.

In order to accomplish the three-week pre-registration program, a five-step procedure has been outlined for University students. The procedure starts with an appointment with the student's faculty advisor at which a tentative schedule of classes will be prepared in triplicate.

Then the schedule must be approved by the dean of the college in triplicate.

Students will be asked to make a \$5 pre-registration fee payment at the Cashier's window in Jardine Hall. Dr. Sours explained that the

(Continued on Page 4)

Newsman Will Tour Campus

Ten newspaper and radio men from several Latin American countries will visit the University today.

Pres. Harry F. Corbin will be host to the group, which is on a tour sponsored by the State Department, at a luncheon in the Pine Room of the Commons at noon, a spokesman said.

The guests will meet some of the University faculty at the luncheon. Dr. Robert W. Frazer, professor of history, and Dean Kenneth Razak, head of the School of Engineering, will attend.

Also, Dr. John Rydjord, dean of the Graduate School, Dr. Eugene Savaiano, head of the Spanish department, and Prof. Paul Gerhard, head of the journalism department, will be among those attending the luncheon.

The visitors will be from Brazil, Chile, and Columbia; Guatemala, Honduras, and Mexico; Nicaragua, Panama, and Peru, according to the spokesmen. About one-half of them can speak English.

The newsmen will visit various places of interest while in Wichita. During the trip to the University they are scheduled to see the wind tunnels and other research departments.

Press Club Sponsors Panelists

"Ailments of Today's Press" will be the topic of a panel discussion sponsored by the Wichita University Press Club.

The panel, to be held Thursday at 8:30 p.m. in the Commons Lounge, will feature as speakers, Dr. Morton Rosenbaum, assistant professor of English; Robert Duncan, English instructor; and Murray Gart, editorial staff member of the Eagle.

Babs Spivey, president of the Press Club said, "The Press Club is sponsoring this discussion to gain insight of the problems that face the American Press today, and also note from the readers' viewpoint, some of the problems that the press does not meet."

"The Press Club is opening the meeting to the public because we feel some of the points to be discussed may be of interest to readers as well as journalists."

35 of New Type Elms Planted On Campus

To replace the dead trees on the campus, 35 elms of a newly developed type have been planted, John Gaddis, superintendent of Buildings and Grounds, said Friday.

He said, he was trying to get the bad spots to look better by commencement.

In the future, he said, he would be working with the city park department in a plan which will have the campus looking very green by next fall.

The extremely cold weather would not hurt the young trees, he remarked, but might injure the older ones with buds and leaves.

Glance at the Globe

BY SARA GOELLER
Sunflower Managing Editor

Last week, the Associated Press released a story over the wire concerning a brainwashing school in East Germany.

After reading this story, it is hard to believe what it would be like attending such a school after being a student of a free and democratic University.

In East Germany "students" are sent to the brainwashing school which has communism injected in all of its courses, including geography, mathematics, and science.

When these students arrive at the school they are given a suit of civilian clothes plus money which would amount to about \$8 in American currency. This money is to be spent to buy personal articles and text books.

While the students are attending school, they are given the equivalent of \$5 a month for "spending money." This is another fact that is hard for American college students to believe. This \$5 has to cover meals, but they are given rent-free rooms in local hotels.

Attendance to these brainwashing classes is compulsory. If a student misses one class he is severely punished, unless he is on his death bed. If he misses more than one class it is off to an Arctic labor camp for 25 years for him.

After a student graduates from this school he is sent out as a lecturer to prove to others the good of Communism and to bring more students in to the brainwashing school. However, when the graduate first goes out, he is placed on observation to see that he continues his good behavior.

Escape from the school is not impossible. In fact, many have done it, but the student fears escape to the West because of the reception he will receive from the free people of his country which he once renounced.

Aggie Relays Cancelled; Shocks to Run Wednesday

Winter weather swept through Stillwater last weekend and forced cancellation of the Oklahoma A and M relays.

Shocker trackmen were scheduled to compete in the meet for their first trials of the year. Officials announced that the meet will not be rescheduled.

Coach Ab Bidwell's cindermen, however, will swing into action tomorrow, if weather permits, against Emporia State Teachers College for a dual meet with the Hornets.

Limited workouts and manpower shortages will hinder the Shocks as they go for another victory over the Hornets. Last year the Shocks came out on top 70% to 60%.

Shock strength will be in the hurdle events, which they used to win over the Hornets last year, with Don Shields, Jim Hervey, both from Wichita East; and Verlyn Anderson, McPherson, set to stride the boards tomorrow.

Wichita is behind in the Emporia State series, winning only three meets in 14 outings.

Netmen Set For Pratt

Pratt Junior College will journey to the Shocker courts this Friday to tangle with a Wichita tennis team composed mostly of sophomores.

The one-two singles punch of captain Dick Peters and Allen Austin will probably be shelved to allow sophomores to play and gain some valuable experience.

The netters set for singles games are Marion Shropshire, Lyons; Charley Doze, Norwich; and Dan Bailey, Wichita North.

Major competition is slated for April 19 when Kansas State College brings their squad to the Shocker campus.

In the first tennis outing for the Wichita squad Southwestern held the Shockers to a 3-3 tie. The Shockers play the school again on April 12 at Winfield.

WRA Ends Play

Badminton and table tennis tournaments sponsored by the Women's Recreational Association were held for women students last Sunday in the Women's Gym.

Martha Reagan and Reta Nester won over Joan Theis and Marlene Brown in the badminton doubles.

Probst Leads WU Linksmen

Shocker golfers are currently qualifying for their season's opener against Nebraska on April 4.

Leading the candidates is junior Fritz Probst, who is reported to be burning up the links despite bad weather conditions. Probst is shooting regularly around the 76 stroke mark.

Other linksmen who will see a lot of action this spring are senior captain Joe Korst, Joliet, Ill.; Harold Stover, and Angel Leon, Wichita North. All are lettermen except Leon who is a sophomore.

There are 24 single players and 15 double teams signed up for the spring's intramural tennis play.

The Tip-Off

by **DON TAYLOR**
SPORTS EDITOR

Shocker basketball coaches Ralph and Dick Miller opened spring basketball drills last week with 16 varsity candidates on hand, preparing for what they term as "easily the roughest season we've ever drawn up."

It might be a rough season but both Millers are extremely pleased that they can now draw top teams with the new field house slated to be ready for opening day.

Tentative plans call for games with Iowa, Wyoming, Texas Christian, Southern Methodist, Utah, and Nebraska. In addition there will be the rugged 10 game Valley schedule.

The call is out for all spring football participants to check out equipment for opening day practice April 4. Next week's sport section is slated to run a complete rundown on the University football.

Baseballers Marc Webb, Charlie Russell, Gary Johnson, and Leroy Hinman have been working out at the YMCA playing handball.

FOR BETTER OR FOR WORSE

The first thought that comes into our minds upon entering college is, of course, marriage. But how many of us go about seeking mates, as I like to call them, in a truly scientific manner? Not many, you may be sure. Most of us simply marry the first person who comes along. This can lead to unpleasant consequences, especially if the person we marry is already married.

Let us today make a scientific survey of the three principle causes of marriage—homogamy, personality need, and propinquity. We will examine these one at a time.

Homogamy means the attraction of like for like. In marriage it is rarely opposites which attract; the great majority of people choose mates who resemble themselves in taste, personality, outlook, and, perhaps most important of all, cultural level.

Take, for example, the case of two students of a few years ago named Anselm Glottis and Florence Catapult. Anselm fell madly in love with Florence, but she rejected him because she was majoring in the Don Juanian Poets and he was in the lowly school of forestry. After graduation Anselm got a job as a forest ranger. Still determined to win Florence, he read every single Don Juanian Poet cover to cover while sitting in his lookout tower.

His plan, alas, miscarried. Florence, sent on a world cruise as a graduation present, picked up the betel nut habit in the Indies. Today, a derelict, she keeps body and soul together by working as a sampan off Mozambique. And Anselm, engrossed in the Don Juanian Poets, failed to notice a forest fire which destroyed 29,000,000 acres of second growth blue spruce. Today, a derelict, he teaches Herrick and Lovelace at the Connecticut School of Mines.

The second reason why people marry, personality need, means that you often choose a mate because he or she possesses certain qualities that complete and fulfill your own personality. Take, for instance, the case of Alanson Duck. As a freshman, Alanson made a fine scholastic record, played varsity lacrosse, and was very popular with his fellow students. Yet Alanson was not happy. There was something lacking in his life, something vague and indefinable that was needed to make his personality complete.

Then one day Alanson discovered what it was. As he was walking out of his class in Flemish pottery, a fetching coed named Grace Ek offered him a handsome brown package and said, "Philip Morris?"

"Yes!" he cried, for all at once he knew what he had been needing to round out his personality—the gentle fulfillment of Philip Morris Cigarettes, the soul-repairing mildness of their vintage tobaccos, the balm of their unparalleled taste, the ease and convenience of their bonny brown Snap-Open pack. "Yes, I will take a Philip Morris!" cried Alanson. "And I will also take you to wife if you will have me!"

"La!" she exclaimed, throwing her apron over her face, but after a while she removed it and they were married. Today they live in Prince Rupert, British Columbia, where Alanson is with an otter glazing firm and Grace is a bookie.

Propinquity, the third cause of marriage, means closeness. Put a boy and a girl in a confined space for a long period and they will almost surely get married. A perfect example is the case of Fafnir Sigafos. While a freshman at Louisiana State, he was required to crawl through the Big Inch pipeline as part of his fraternity initiation. He entered the pipe at Baton Rouge. As he passed Lafayette, Ind., he was agreeably surprised to be joined by a comely girl named Mary Alice Isinglass, a Purdue freshman, who had to crawl through the Big Inch as part of her sorority initiation. When they emerged from the pipeline at Burlington, Vermont, they were engaged, and, after a good hot bath, they were married. Today they live in Klamath Falls, Ore., where Fafnir is in the weights and measures department and Mary Alice is in the roofing game. They have three children, all named Norman.

Get your copy, absolutely free, with the purchase of a couple packs of Philip Morris at your favorite tobacco counter. Hurry! The supply is limited.

More Coverage

This is the thirty-second issue of The Sunflower for this school year. According to past years, the school newspaper ceased publication with the thirtieth issue.

However, this semester The Sunflower has started a new practice of publishing twice a week in order to offer to the students more campus news coverage.

Through such a schedule The Sunflower staff feels it has accomplished just such a purpose. It has been able to "scoop" the downtown papers on campus affairs. No more does the student have to read about it first in a professional paper.

The Sunflower also feels it has been able to provide the campus wider coverage with the inauguration of the bi-weekly paper. The present system is in the experimental stage right now, but in time it is hoped that more and more corners of the campus may receive full coverage.

At the present time, even though there are two papers a week, the staff still feels that it is not giving the campus the coverage it deserves. The staff still is striving each week to plug up this weakness in the paper.

It is hard for the paper to see all of its weaknesses. But with the aid of suggestions from students about their newspaper, The Sunflower can feel it is accomplishing its set purpose.

Prof to Do Forest Study

A study of Kansas forests will be launched this summer by Dr. Mason E. Hale, Jr., assistant professor of botany and bacteriology.

Dr. Hale has received a grant from the University's research fund to do a basic study which might be applied to state conservation and reforestation programs sometime in the future. He will study classes, sizes, and reproduction of trees in Kansas forests.

Dr. Hale will also have the opportunity to do chemistry research this summer, having received a \$1,100 grant from the Lator foundation of Wilmington, Del. He is one of 20 specialists in this field of chemistry-biology to receive such a grant.

The project will take him to the National Agricultural College near Philadelphia, Pa.

The professor, a native of Connecticut and a graduate of the University of Wisconsin, has specialized in forestry and chemistry for a number of years.

Student Forum To Have Humorist

Arthur Treacher, the stage, screen, radio, and television personality who achieved fame as "the perfect English butler," will be the Student Forum speaker on April 13.

In presenting his program, "A Little of This, Something of That, Mostly Humor," Treacher will be trying a new medium—the lecture platform—in a series of readings from humorous literature.

The program will be presented at the Auditorium at 8:15 p.m., it was announced by Max Maguire, Student Forum Board president.

Treacher will be present at the regular Student Forum banquet preceding the program, at 6 p.m.

Students will be admitted by ID cards. For others the admission price will be \$1.

Shock Talk

To the Editor

Who are the people that believe integration of the Greek Letter organizations a few times a year would be impossible?

Is it hard to believe that the Greeks on the campus would not sacrifice a little personal glory to work with other organizations for a common good?

Competition among the Greeks is excellent. It keeps the organizations working as individual units striving to attain top ranking on the campus.

Through competition, the organizations have strengthened themselves as individual units. Why not pool these units into one tremendous force when the opportunity arises? This would raise the prestige of the Greeks on the campus and in the community, besides achieving the tremendous results that are undoubtedly possible through such a combination of potential.

Wichita University is one of the campuses where the Greek letter organizations are in a position to dictate campus politics, although outnumbered by the unaffiliated students. This shows the possibilities of good organization and working together.

Why not put this organizing force to another use, the spearheading of charitable and worthwhile projects important to the campus and the community.

Sincerely,
John Dill

Pre-enrolling Will Be Held April 11-29

Following is a step-by-step summary of pre-registration procedure for the fall semester announced by the offices of Student Services and Registrar Friday.

The plan is voluntary for students currently enrolled at the University, but will help simplify enrollment procedure in September and will also assure class programs and class spaces in advance for participants in the program.

1. Pre-registration will take place from Monday, April 11, to Friday, April 29.

Students who elect to pre-register will make an appointment with their counsellors and prepare a tentative schedule of classes in triplicate.

2. The three copies of the tentative schedule of classes are to be taken to the office of the dean of their college for signature.

3. The three copies of the tentative schedule of classes are then to be taken to the Cashier's Office, Room 125, Jardine Hall, where the pre-registration fee of \$5 will be paid.

4. Students take the approved schedule of classes to the Registrar where the schedule will be tallied against class quotas.

Two copies of the schedule will be retained by the Registrar's office.

5. If for any reason, students cannot enroll in courses agreed upon during the pre-registration period, the student must make an adjustment in his schedule of classes and have his revised schedule verified in the dean's and Registrar's offices. Such changes must be made before August 15, 1955. Changes cannot be made after this date. Second semester students who do not have validated schedules of classes will register Thursday, Sept. 8, 1955.

Contributes To Volume

A chapter on educational psychology by Dr. Gordon C. Hanson, education professor, is his contribution to a book in which each author describes what is being done psychologically in his field.

The symposium is edited by A. A. Roback and entitled "Trends in Psychology."

Dr. Hanson said that he had never seen a book which covered so much with such a variety of authors. There are 35 contributors.

English Dept. Represented at National Meet

Miss Helen Throckmorton represented the University at a Chicago conference designed to improve communication courses throughout the country.

The English instructor attended this national spring meeting of the Conference on College Composition and Communication Thursday, Friday, and Saturday.

Panel discussions and general sessions work to establish the objective of improving communication courses.

The conference is a group within the National Council of Teachers of English.

Pre-registration (Continued from Page 1)

fee is designed as an evidence of "good faith" on the part of the student as the University is also committing itself to advance scheduling for students. The \$5 fee will be credited to the student's tuition account during fall semester. However, if the student does not return to the campus the fee is forfeited.

Following the payment of the fee, the cashier will mark all three copies of the tentative schedule paid.

The student must then return the class schedules to the registrar's office where a tally clerk will check the schedule against class quotas.

Dr. Sours pointed out that this is a "must-step" in the pre-registration procedure.

The registrar will send one copy back to the dean, he will retain one copy which will be used to admit the student to registration in the fall, and the student will be given one copy of the schedule.

Both Dr. Fletcher and Dr. Sours requested students to plan their schedules carefully in order to avoid changes. Schedule changes will be made with the approval of the faculty advisor, dean, and registrar until August 15. However, any changes after that time will void the entire schedule and the student will be required to go through the old registration process in September.

Junior Logo Will Become Frat Chapter

The Junior Logopedics group will be installed as the Omega Chapter of Sigma Alpha Eta, national speech and hearing fraternity, at the Institute of Logopedics, Thursday at 8 p.m.

Miss Ruby Wilson, preceptor at the Institute, has been chosen as advisor and will be in charge of the ceremony.

One of the objectives of the organization will be to offer opportunities for social and professional fellowship and to provide situations in which students and faculty may work together to advance the profession as a whole.

Among the guests invited are Dr. and Mrs. Martin F. Palmer and the staff of the Institute.

Members of the group include: Mrs. William Zook, La Verne Baker, Shirley Quick, Bobbi Holdern, Liv Johannessen, Clarice Bryant, Alice Campbell, Maureen Daily, Bob Kuhn, and Joe Korst.
