

# Bill Offers Solution To Shortage of Funds

By ERNIE SHINN  
Sunflower Staff Writer

(EDITORS NOTE: This is the first of a series of two articles on the problems facing the municipal universities in Kansas.)

The key to higher education may soon be in jeopardy for many high school graduates because of the shortage of funds to provide for the increased enrollment in tax-supported colleges.

More and more high school graduates are disappearing annually from private college campuses and are found in the ever-increasing student bodies of tax-supported schools.

The facts reveal that the tax-aided schools are attracting in great proportion the larger share of the nation's college students.

Historically, the state of Kansas has located its state supported schools near concentrated centers of population. The state constitution stipulates: "Provision shall be made by law for the establishment at some eligible and central point, of a state university."

The University of Wichita is centrally located and the job opportunities provide means for many students to attend school. The cultural and vocational experiences available to the students also attract them.

"We have 1,620 students from outside Wichita who are attending this year, and of this group 1,200 of them are wholly self-supporting," according to a university spokesman.

Should the current enrollment trend continue and adequate resources become available, the University of Wichita will serve 8,800 students by 1970. The present enrollment of 3,900 students represents the enrollment predicted for 1959.

From the registrar's records the enrollment figures show an average of 3.4 per cent increase each year in the past five years. An enrollment of 4,200 is expected next fall. This would mean a 11.7 per cent increase.

Considering the problem of caring for the steadily increasing enrollment at the University, additional assistance must be obtained, over and above present income from tuition and municipal taxes.

The program of the State Aid Bill would adequately provide this assistance.

"The State of Kansas can best discharge its higher educational responsibilities by assisting its two municipal universities through the creation of a Municipal University Fund together with adequate support of its growing state institutions of higher learning," according to a recently-published pamphlet regarding the matter.

Thus, the State Aid Bill would seem to be an economical way to provide facilities for the expected increase in enrollment.

"It will be cheaper for the State to give supplementary support to colleges already established, than to expend funds for new schools," the university spokesman pointed out.

These, then, are the facts behind the State Aid Bill:

1. The regional aspect of the university student body.
2. The anticipated increase in enrollment.
3. The service performed by the municipal school to the entire state by providing regional education.
4. The greater economy effected for the whole state as a result of strengthening the financial position of an already-existing school, serving a region rather than just a city.
5. The financial, professional, and cultural advantages for students attending universities located in metropolitan areas.

## WU Physicist To Work On Atomic Series

Glenn E. Shepard, chief physicist at the foundation for Industrial Research, has been selected by the Federal Civil Defense Administration to participate in its training program at the Nevada Test Site in connection with the present atomic test series.

Participation by Sheppard in the program was made possible through the foundation of Industrial Research and the Wichita-Sedgwick County Civil Defense Organization.

## News Briefs

Pres. Harry F. Corbin has announced that a second Harry Gore Scholarship will be awarded at the University. The four-year award is for \$1,000 a year and will be awarded this spring to a high school senior planning to enter the University next year. It is the second scholarship formed by Ted and Ralph Gore in memory of their father, the late Harry Gore of Wichita.

A conference of 29 Asian and African countries met at Bandung, Indonesia last week. The meeting was marked by a note of controversy right after its opening when Iraq's foreign minister denounced in-

(Continued on Page 4)

## Trip Taken To New Mexico By Geologists

Visiting the Taos Mountains, mines, and the Rio Grande valley, were among the activities of 45 geology students who took the Geology Club field trip to Eagle's Nest, New Mexico over the Easter holidays.

Seven coeds and 38 men made the trip, accompanied by Asst. Prof. A. J. Lang, and Dr. R. V. Christian of the chemistry department.

Professor Lang said the purpose of the trip was to give geology students a chance to see and study geology formations that they have studied, and to collect geological specimens for the department.

## Pros Discuss Ad Techniques

A series of professional lectures by Wichita advertising men is now underway to bring advanced advertising students up-to-date on the latest techniques in newspaper, radio, television, and outdoor advertising, according to Paul F. Gerhard, head of the journalism department.

On April 20, Dean Campbell of the sales staff of television station KEDD, will speak and Jerald Branson, manager of the Western Outdoor Advertising Company, will speak April 27. On May 4, Joe Ludiker, of Lago and Whitehead Advertising Agency will

SPRING PRACTICE—Head Coach Pete Tillman shows the Shocker linemen some inside pointers on line play during a grid drill last week. The Shockers climaxed early grid drills with an intersquad game Saturday night in Veterans Field.

## ROTC Units To Review On Thursday

The tramp of feet of more than 500 Army and Air Force ROTC cadets will be heard Thursday as the two reserve training units take part in separate programs.

Air Force cadets will march in a formal review for their annual inspection Thursday during 11 a.m. drill.

Meanwhile Army cadets will hold a review in honor of the Pershing Rifles, honorary military fraternity.

Col. Louis R. Delmonico, professor of military science, said the review will be held in recognition of "the many commendable projects in the interest of the University and the community" that Pershing Rifles has sponsored this year.

The Air Force inspection will cover an examination of classroom and drill field training.

Lt. Col. Elmon R. Cobb, professor of air science, said the group will be graded on teaching procedures, effectiveness of instructors, and general military bearing of cadets.

A team of three Air Force officers from other Air Force ROTC areas in the country, will make the inspection.

The Army's review will honor Pershing Rifles after the participation of the group in the campus blood drive, sponsoring a Halloween party for children at the Institute of Logopedics and color guard ceremonies at University and Kansas high school activities.

Parents and friends of Pershing Rifles members have been invited by the Army ROTC to attend the review and a coffee in the Armory immediately following the review.

## New Enrollment Plan Lags; Registration Ends April 29

The number of students participating in the new pre-registration program which began last week is fewer so far than had been expected, according to Dr. Worth A. Fletcher, registrar.

About 125 oncoming freshmen and about 50 University students have taken advantage of the present enrollment period which ends Friday, April 29.

"As the plan was just started, it apparently hasn't really caught on yet," Dr. Fletcher said.

"The biggest selling point of the new enrollment plan is that students can be guaranteed the courses they want at the hours they want," Dr. Fletcher said.

"This program permits more leisurely counseling than is possible in the rush days of the fall," Dr. Fletcher continued. "Actually the students shouldn't have to be

urged, as it is something from which they themselves would benefit," he added.

It was hoped that some 1500 to 2000 of the present students would make use of the pre-registration procedure, Dr. Fletcher pointed out.

"Students should do it now instead of waiting until the last week of April when they are likely to encounter lines as long as in September," he said.

Schedule changes will be approved anytime until August 15.

## 2 Professors Appointed to Govt. Positions

Two University faculty members have been appointed to part time government positions, one with the census bureau, and one with the Air Force.

Dr. Donald O. Cowgill, head of the sociology department, has accepted the appointment of Census Tract Key Person for Wichita. Dr. T. Reese March, dean of Adult Education, has been appointed to the Wichita Air Reserve Center Advisory Board.

Dr. Cowgill was act as contact man for the Bureau of Census in relation to the design of districts for census taking and for tabulation of data for the censuses of population and housing. The census bureau published a special bulletin for Wichita concerning census tracts which was compiled by Dr. Cowgill.

Dr. Marsh, upon the recommendation of Col. Don C. Ross, commander of the 9156th Air Reserve, was appointed to the Reserve advisory board. This board will assist and advise the Commandant of the Wichita Air Reserve Center in instituting specialized training for members of the Air Force Reserves in the Wichita area.

## Glance at the Globe

BY SARA GOELLER  
Sunflower Staff Writer

Last week one of the biggest announcements in medical history was made. It was simple but important. "The Salk anti-polio vaccine is safe . . . it is effective and potent."

The Salk vaccine was found to be 80 to 90 per cent effective in polio tests conducted throughout the United States last year. The man who developed it, Dr. Jonas Salk, announced that an improved model of the vaccine used in the tests last year was a great success.

Dr. Salk immediately declared he was sure the vaccine is potentially almost 100 per cent effective and can bring complete triumph over polio and its lieutenants of terror and tragedy.

There is no doubt that children now can be vaccinated successfully to end the threat of polio and the anxiety it causes every year. The vaccine was found incredibly safe, with only four-tenths of one per cent of children suffering minor reactions.

Statistics released on the Salk Vaccine tests showed that of the nearly two million children participating in the tests, 113 cases of proven polio occurred, and 71 of those developed paralysis. There was one death, that of a child who had received only two of the scheduled three shots and had undergone surgery for the removal of tonsils during a polio epidemic.

President Eisenhower was quick to order a federal survey to determine how to assure fair distribution of the newly-proven vaccine. He also sent the latest information on the Salk polio prevention to nations around the globe, including Russia and other Communist countries.

Across the nation, doctors and clinics were busy organizing the big job of inoculating millions of children. Most local inoculation programs are expected to get started this week.

The National Foundation for Infantile Paralysis has endorsed Dr. Salk's proposals for changing the system of injections of his vaccine. That is to give two instead of three shots within a short period, and a booster shot not earlier than seven months after the

(Continued on Page 3)

# WU Grid Clinic Hosts High School Coaches

The second annual spring football clinic held on the Shocker campus last Saturday was a compete success, according to many of the more than 100 Kansas and Oklahoma high school grid coaches who attended.

The popular split-T formation was the center of highspots singled out in the conclave. Head football coach Pete Tillman, Shocker mentor, and Darrell Royal, Mississippi State head man, led most of the talks.

Also on the lecture roster were Shocker coaches Claude Arnold, Dick Monroe, and Dick Tomlinson. To add exact demonstration, the entire squad of the 1954 Missouri Valley Football champs, the Wichita Shockers, were on hand.

Tillman directed talks on line play along with Monroe and Tomlinson, Royal and Arnold, two of Oklahoma's greatest quarterbacks, talked on offensive and defensive backfield play.

In Arnold and Royal the Wichita clinic had the duo that holds college and national records at Oklahoma University. Royal was considered the "greatest running split-T quarterback at OU" while Arnold is considered the "greatest passing star in the split-T formation."

The clinic also featured lectures on training injuries and care, and hints on managing a high school or college football team. The effects and results of the Shockers' pidgeon-toed split-T was also a part of the clinic.

Following the gathering, the Shocker grid squad divided into two squads for an inter-squad tilt.

# Shock Nine Hosts Chiefs

The Shocker baseball nine will open its first home game of the current year at the West Side Athletic Park, today, hosting Oklahoma City University in a double-header.

The team just returned from Houston last weekend where they played the Cougars three games.

Shocker hurlers slated to throw in the Oklahoma City games will be either Leroy Hinman, Charlie Russell, Jim Strathe, or Dick Dawson, with Hinman and Russell getting the first nods.

Around the infield Shockers fans will see Tony Strupa at first base, standout Marc Webb at the keystone, Jim Klisanin at the shortstop slot, and Harold Dwyer at third.

Heading the outfield post will be senior John Reed. Footballer Ray Fulton and Leon Wagner will start at the other fielding positions.

Senior Jim Haight, catcher, will handle the throws of the Shocker pitchers.

Tulsa brings its diamond squad to Wichita this weekend for a three game series starting, Friday, April 22.

# Shocks Lose Cinder Test

Despite an excellent showing by senior Don Shields, who swept through the hurdle events, and lanky Bob Hodgson, who countered with a record javelin throw of 194 feet, 7 inches, the Shocker cindermen lost their dual meet with Pittsburg State last Tuesday afternoon in Shocker Stadium, 77 3/5 to 58 2/5.

With the races won by Shields an exception, the Pittsburg Staters won all the running events to run up the winning score.

# WRA Plans Tournament

A swimming meet, bowling tournament, and tennis tournament are activities scheduled by the Women's Recreational Association for this week.

Deadline for the swimming meet is Tuesday. Women who have signed must have practices before the meet, according to Miss Elizabeth Meyer, women's physical education instructor.

Practices may be held in the Wichita High School East pool any Tuesday, Wednesday, or Thursday at 5 p.m. All women who plan to participate in the meet must have a doctor's permit, Miss Meyer said. The meet will be held April 28 in the East High pool at

panies will be played on the cadet drill field every Sunday at 3 p.m.

# Army ROTC Fields Strong Mural Nine

Members from four Army ROTC softball teams, chosen by company team members, will compose an all-star team which will compete in the University intramural softball league.

Plans got underway last week to continue the ROTC athletic policy, Col. Louis R. Delmonico, professor of military sciences, said.

Ball games between the com-

5 p.m. Playoffs for the WRA bowling tournament were held Friday afternoon at the Skybowl.

The WRA tennis tournament will be held Sunday on the University tennis courts at 2 p.m. Eleven women have signed up for singles and five pairs will play doubles.

## THE STUDENT COUNCIL

Today let us investigate a phenomenon of American college life called the student council. First of all, what is the student council? The answer is simple: the student council is a council of students.

Next, what does the student council do? Again the answer is simple: it meets.

Next, what goes on at the meetings? This question is rather more complicated than the others. Perhaps it can best be answered by reproducing here the minutes of a typical meeting of a typical student council.

Meeting scheduled for 8:30 p.m. at Student Union Building. Call to order 9:51 p.m. by Hunrath Sigafos, presiding. Motion to adjourn made by Louis Bicuspid, freshman representative. Motion ruled out of order by Hunrath Sigafos, presiding. Hunrath Sigafos called "old poop" by Louis Bicuspid, freshman representative. Seconded by Delores Wheatgerm, sophomore representative. Tabled by Hunrath Sigafos, presiding.

Minutes of last meeting read by Zelda Pope-Toledo, secretary. Motion to accept minutes made by Hunrath Sigafos, presiding. Motion defeated.

Treasurer's report not read because Rex Mercredi, treasurer, not present at meeting. Rex Mercredi, treasurer, impeached in absentia.

Motion made by Louis Bicuspid, freshman representative, to allow sale of hard liquor in school cafeteria. Seconded by Delores Wheatgerm, sophomore representative. Motion tabled by Hunrath Sigafos, old poop.

Motion made by Booth Fishery, fraternity representative, to permit parking in library. Motion referred to committee.

Motion made by Gladys Algae, junior representative, to allow attendance in pajamas and robes at first hour classes. Motion referred to committee.

Motion made by Elwood Feldspar, athletics representative, to conduct French Conversation classes in English. Motion referred to committee.

Motion made by Esme Plankton, sorority representative, to allow hypnosis during Rush Week. Motion referred to committee.

Motion made by Pierre Clemenceau, foreign exchange student, to conduct German Conversation classes in French. Motion referred to committee.

Motion made by Harriet Critter, ag campus representative, to allow faculty members above the rank of assistant professor to perform marriages. Motion referred to committee.

Observation made by Martha Involute, senior representative, that in her four years on student council every motion referred to committee was never heard of again. Miss Involute was tabled.

Motion made by Louis Bicuspid, freshman representative, to allow sale of hard liquor in Sociology I and II. Seconded by Delores Wheatgerm, sophomore representative. Motion tabled by Hunrath Sigafos, presiding crossly.

Refreshments served. Coffee, cake, Philip Morris Cigarettes. The following resolution adopted by acclamation:

"WHEREAS Philip Morris is milder, tastier, more exhilarating, and chock full of rare rich vintage tobaccos; and WHEREAS Philip Morris is contained in the patented Snap-Open pack which is the quickest, simplest, neatest container yet devised for cigarettes; and WHEREAS Philip Morris, the most commendable of smokes in the most admirable of wrappings, is available in both king-size and regular; therefore BE IT RESOLVED that it is the sense of this meeting that Philip Morris is far and away the best cigarette buy on this or any other campus."

Meeting adjourned with many a laugh and cheer at 9:58. Respectfully submitted,

Zelda Pope-Toledo, Secretary

©Max Schulman, 1955

The makers of PHILIP MORRIS, who bring you this column, move that today's PHILIP MORRIS is the best ever. We know you'll second the motion.

## All Should Help

The coming of spring has enhanced the beauty of the campus so that it is something that one can point to with satisfaction.

The Building and Grounds personnel, whose task among others, is the maintenance of the campus landscape, needs the cooperation of the student body to keep the campus alive and green. The job should be assumed by everyone.

Students can cooperate by using the sidewalks and avoiding the "short cuts." Unfortunately the present practice is using the short cuts with the results of trampling down the young grass.

Each student should show consideration for his school, by shouldering the responsibility of keeping the campus pretty. This can be done by using the sidewalks and depriving himself of the short cut which perhaps is the nearest route to defacing the campus.

In addition, we think that it's about time for the campus organizations to do something about it too.

In the past, their predecessors, who, by the way, had never been disgraced to the point of being classified as "playboys," showed their consideration for the school by installing signs on the landscape.

Today these organizations, of which the University has been proud in the past, are given a chance to become of some use. We hope they will take advantage of the opportunity.

### Glance at the Globe (Continued from Page 1)

first two.

Personal reactions to Dr. Salk's success were almost the same all over the nation. Editors and commentators praised the work of the scientist.

His parents said that they had known all along their son's vaccine would be a success. As congratulatory phone calls poured in to their home, the mother wept

for joy and the father said, "I have no words. I just feel great."

Across the country other tears of joy were shed by comedian Eddie Cantor who, along with Franklin D. Roosevelt, started the March of Dimes in 1933.

Dr. Salk also was honored when

## Historians Meet Here

Approximately 75 delegates of the Kansas Association of Teachers of History and Related Fields met on the campus, Saturday to hear historical papers and to elect William E. Seiler, Kansas State Teachers College, Emporia, president of the group.

The representatives to the 29th annual meeting of the association heard papers dealing with subjects of current historical importance as well as addresses dealing with techniques and methods of effectively presenting history in the school curriculum.

Other officers elected at the Saturday meeting in the Commons Lounge included Dudley T. Cornish, Kansas State Teachers College, Pittsburg, vice-president; Raymond L. Florey, McPherson College, secretary-treasurer; and

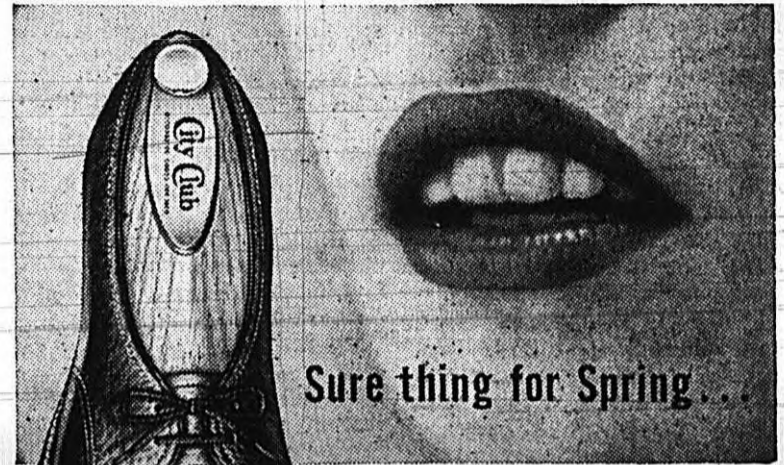

the Criss Award board of judges announced he had been named the 1955 winner of the \$10,000 Mutual of Omaha Criss Award and Gold Medal.

One sad part of the story of the Salk vaccine tests was that many parents refused to permit their children to be given the tests last year. However, with the proved results known, it is expected that the Salk vaccination will become as common and expected as the smallpox vaccination.

Edwin Walbourn, El Dorado Junior College, and A. B. Sageser, Kansas State College, Manhattan, executive councilmen.

Pres. Harry Corbin addressed the group on the subject, "Observations of the Orient."

## 105 Frosh Take Exams

One hundred and five students from Wichita and the surrounding area who plan to enter the University next fall took freshman entrance examinations Saturday morning in Neff Hall.

The students, representing 12 high schools, brought the number who have taken the pre-enrollment test to 350, according to Frank Entwisle, in charge of testing.

Those who have completed the test will be given appointments later this month and follow the pre-enrollment procedure, Entwisle said.

"The spring pre-registration program inaugurated this year is a somewhat unique idea among colleges and universities in Kansas," he stated.

Entwisle added that the Saturday turnout was about the number expected.

## 20 Engineers Take Trip to Kansas City

Twenty Engineering students visited Kansas City industries last Friday, on a field trip sponsored by the mechanical engineering department.

Students taking the trip were Bob Argumedo, Ronald Carey, Mack Castrigos, J. W. Dunn, Lloyd Edwards, Richard Eaton.

Dick Hamilton, Ronald Hill, F. V. McDaniel, Waller Newby, Ron Panton, Jack Parker, Charles Schlicher, Richard Schmitt, R. W. Small.
