Tuition To Rise Next Fall

The first increase in the per semester hour tuition rate since 1955 was expected to be voted by the Board of Regents at its regular March session last night.

The Ways and Means Committee of the governing body took a recommendation to the Board, for a \$2.50 per semester hour increase beginning next fall.

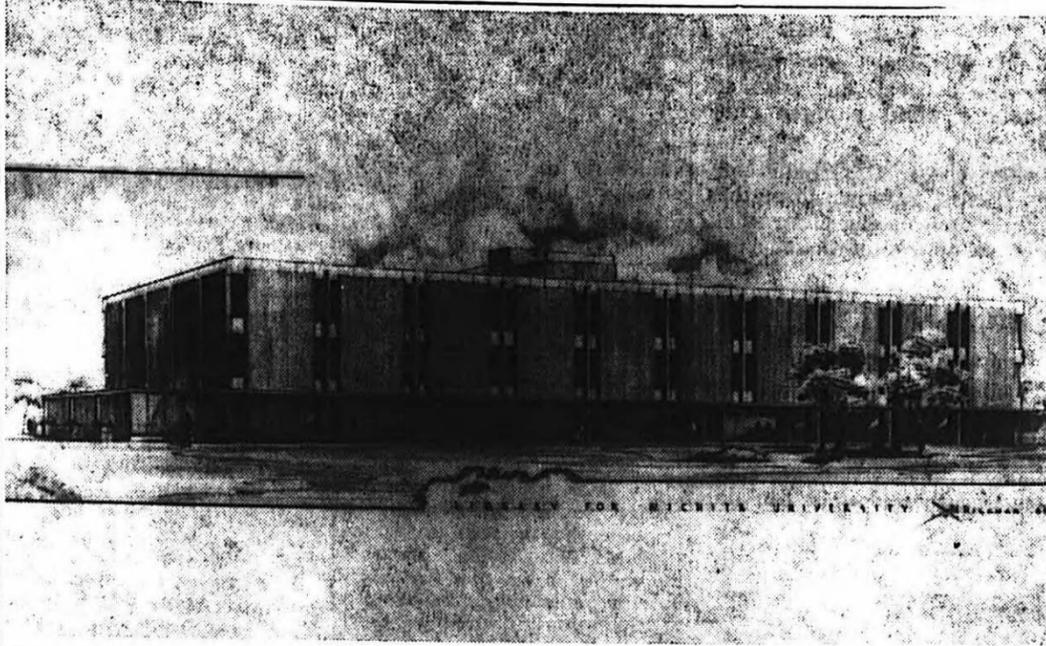

Robert B. Morton, chairman of the committee, in making the recommendation stated:

"To maintain a strong faculty, to preserve and improve an educational program, and to meet the rising costs of instruction, maintenance and administration, the University is compelled to raise tuition \$2.50 a credit hour, effective in September, 1960."

The tuition increase means that Wichita residents will pay \$12.50 a credit hour starting with the fall semester, and the non-resident tuition will be \$15 a credit hour. Tuition rates for graduate students will not be increased.

President Harry F. Corbin said the tuition increase is essential in order to "make a budget for the 1960-61 fiscal year."

The present credit hour tuition rate of \$10 was established in 1955. In 1958, the maximum tuition of \$150 per semester was (Continued on Page 4)

NEW LIBRARY CLOSER—The new proposed library may become a reality sooner than expected due to a gift which was presented at last night's Board of Regents meeting. The Frank and Harvey Ablah families presented the University with the title to a parcel of land, title to and income from an office building and the equity in the building. Construction should, thus, begin in 1961.

The University of Wichita became the recipient of a major real estate gift from a pioneer Wichita family Monday night which is expected to provide the major portion of financial resources needed for construction of a new campus library.

Announcement of the gift, made by the families of Frank and Harvey Ablah, was made during the regular March session of the WU Board of Regents, by Glen Gardner, director of development at the University. The Ablahs have resided in Wichita since 1907.

The gift—largest of its kind received to date by the University through its development program—includes the following:

(1) Title to a parcel of land located at the northwest corner of 1st and Water in downtown Wichita and valued at an estimated \$250,000.

(2) The title and all income from the nine-story, ultra-modern Colorado Derby Building now under construction on the downtown property. The revenue to be realized by the University, above expenses and debt service, is anticipated to be in excess of \$1,500,000 during the first 20 years. It will then provide approximately \$225,000 per year to WU.

(3) The Ablah's equity in the building over and above an expected \$1.95 million in revenue (Continued on Page 4)

Seacat Elected May Queen

'Wichita 1984' To Be Theme Of YPO Meet

"Wichita in 1984" will be the theme of the third annual Young President's Organization Conference in the CAC Ballroom at noon, tomorrow.

Alpha Kappa Psi, professional business fraternity, is sponsoring the event, which will be in the form of a luncheon conference. No formal talks are scheduled, but rather, the members of the YPO attending will be seated around the room at tables with students to lead the discussion and answer questions.

Young President's Organization is a national group composed of men under 40 who head businesses grossing over \$1 million a year.

The YPO is covering the entire cost of the meal for the event.

Jeanne Seacat, Fine Arts senior, was selected by the student body to reign as May Queen in the May Day festivities, on May 6.

Miss Seacat is a member of Delta Gamma sorority, Tau Beta, band sorority, Kappa Phi, Methodist sorority, and is a member of the a cappella choir.

She was Press Queen in 1959, Homecoming princess in 1958, and a ROTC Sweetheart in 1959.

A School of Music student majoring in piano, Miss Seacat is from Cunningham.

Allan Johnston, student election commissioner, announced that 746 students cast their ballots for the six candidates vying for the Queen nomination.

Also nominated for the honor were; Shirley Gilley, Alpha Phi; Donna Kay Gooden, Delta Delta; Lillian Huffman, Delta Dorm; Barbara Miller, Alpha Chi Omega; and Karen Williams, Gamma Phi Beta. These coeds will serve as Miss Seacat's court.

Anti-slander Party Policy--- Richardson

A campaign manager has been appointed and an anti-mud slinging policy established by the new campus political party, CHANGE, according to Lyle Richardson, party chairman.

John Ritchey, Liberal Arts sophomore, is campaign manager. The appointment was effected "in order to bring the major political issues before the student body as soon as possible," Richardson stated.

"We will not engage in name-calling, mud throwing, or any other forms or attempts to slander the opposition candidates," Richardson said, in regard to party policy. "Furthermore we will answer any objective, constructive criticism that any student or faculty member (Continued on Page 4)

AFROTC Unit Wins Trophy

Squadron honors and another six-week lease on a rotating trophy went to the Special Activities Squadron of the Air Force ROTC for the second straight time in intra-squadron competition Thursday.

Maj. Glen E. Funk, assistant professor of air science, presented the award to Cadet Maj. John L. Davidson, commander of the winning squadron. Cadet Davidson's squadron outpointed three other groups for recognition in areas of drill, inspection, records, and office proficiency.

During the next six weeks, the four AFROTC squadrons will again compete for possession of the trophy.

Grads Pass Exam To Become CPA's

Fourteen University of Wichita graduates were among the 38 persons successfully passing last November's certified public accountant examination, according to results released recently by Prof. Howard F. Stettler, secretary of the Kansas Board of Accountants, at the University of Kansas.

Included in this group was Norman E. Klein, who was graduated from the University this January.

'Goodbye, My Fancy' To Open Here Thursday

"Goodbye, My Fancy," a three-act comedy, will be presented Thursday, Friday, and Saturday in the Commons Auditorium. Curtain time is 8:30 p.m.

The play is a striking statement about one's thinking in relation to war, freedom of spirit, and courageous action in support of academic principle, according to Dr. Eugene Hoak, director.

Cast of 21
In leading roles are Karen Pyles, Pam Postier, Susan Taylor, Felix Peters, Jon Blubaugh, and Gary Bender. The cast includes 21 students, Dr. Hoak said.

The action of the story takes place on a college campus when a Congresswoman returns to be awarded an honorary degree. The story revolves around her attempts to acquaint the college students with the horrors of war by film, which the college trustees consider harsh and improper. The story also concerns the battle between two men for the woman's affections.

Considerable comedy relief is supplied by Woody, the hard-boiled private secretary, played by Miss Pyles; Miss Shackelford, a fast-talking alumni secretary, played by Brenda Hollow; and Ellen Griswold, a bouncy, champagne tipping alumni president, played by Jean Ann Stevens.

Teachers Portrayed
Additional comedy will be found in Miss Birdeshaw, the humorous sex hygiene instructor, played by Susie Engleman, and Professor Dingley, a butterfly-chasing botany professor, played by Merrill Grohman.

Set designs were prepared by Prof. David Fleming. Speech major Steve Gibson is the assistant director.

Students will be admitted with ID cards. Regular admission is \$1.

QUEEN ELECT—Jeanne Seacat, Delta Gamma, who was elected May Queen Friday, will reign over May Day festivities, May 6. Miss Seacat, above, is surrounded by her court, which includes: (left) Shirley Gilley, Alpha Phi; and Barbara Miller, Alpha Chi Omega; (right) Donna Kay Gooden, Delta Delta; Karen Williams, Gamma Phi Beta; and Lillian Huffman, Grace Wilkie Hall.

The Editor's Board

New Policy Needed...

Since all the figures have been calculated by the SGA on the Library Benefit Concert, a fact comes to light that disturbs us greatly.

Not only does it annoy us, but we have heard complaints from SGA members and other students.

The annoying fact is the matter of a \$500 rental charged the SGA for the Fieldhouse. We realize that there is expense involved to open the Fieldhouse and to pay operational costs, but certainly not \$500.

The only services covered by the fee were "maintenance", custodial expenses after the concert, and payment for one maid and porter. Fieldhouse bond payment also comes from rental fees charged.

For approximately half this fee, the L. O. Grindle company was contracted to provide officers, gatemen, directors, ushers, a maid and porter, providing and placing chair stickers for reserved seats. They also took charge of ticket sales. The cost—\$253.

The concert was sponsored by a University organization, the SGA, for the benefit of the University, and yet they were charged, what we feel is an outrageous fee.

We feel that a new rental policy should be set up for University organizations, especially when the scheduled event is for the benefit of the entire University.

We feel that the charge for such an event should cover expenses. Other means should be used to retire the building bonds.

And It Snowed--

Let it snow . . . let it snow . . .

And it snowed. Last week, we were "up to our ears" in the white fluffy stuff. Campus drives became narrow, almost impassible paths, and parking lots—those great white, slippery expanses—became impossible nightmares for students and others who use them. In fact, motorists in the area had jangled nerves and short tempers well before the week was over.

Where were the snow plows? Well, they managed to clear paths on or near sidewalks so people could walk through the 11-inch blanket. It seems, however, that they were somewhat slow in clearing adequate car paths through the parking lots. In the final analysis, it is easier to walk through the snow than to drive through it—as it was last week. The situation was so bad at times that some streets, drives, and lots were blocked by stranded motorists whose cars were hopelessly stuck.

Adding to the confusion was an early-morning meeting in the CAC. Those attending consumed all, or nearly all, parking space around the building, leaving few for students who had to get to their classes. As a result, many became discouraged and went home.

It seems it would be wise to schedule such events at times other than when parking areas are sorely needed by students. Mornings are when classes are particularly "heavy."

It is realized that such weather causes hardships on all parties concerned—students, faculty, staff, and everyone. But, we would like to urge prompt attention to the clearing of parking areas. We would also like to urge that some attention be given to scheduling of meetings and other events at peak traffic hours on the campus.

Science Fair Exhibit Set

The fourth annual Wichita Regional Science Fair will be held March 18 and 19, according to an announcement by the co-sponsors of the event, the Sedgwick County Medical Society and the University.

More than 150 science projects by junior high and high school students from an eight-county area including Butler, Cowley, Harper, Harvey, Kingman, Reno, Sedgwick, and Sumner counties, are expected to be displayed in the two-day exhibit.

Entries will be divided into biological and physical science sections at both junior and high school levels. In addition to cash awards for each unit, two grand prizes will be presented to enable the top winners to take their projects to the National Science Fair at Indianapolis in May.

This year for the first time, the exhibit will be held in the University Fieldhouse.

We Get Letters..

Letter to the Editor:

I wish to express my heartfelt thanks to all individuals and groups who helped make the Kingston Trio Concert a tremendous success. I am sure that without the outstanding cooperation of all persons involved we could not have had such a fabulous show. I feel that an undertaking such as this requires a completely unified effort, and the members of SGA, CAC, and many others not involved with either, helped to make this one of the outstanding achievements of 1960. Once again, thank you very much and good luck to anyone who undertakes such a project in the future.

Howard Solomon

SGA Representation Viewed

A number of letters have recently been written to the Sunflower concerning representation in local student government.

THIS WEEK'S QUESTION:
Do you think the Greeks on campus should have more, equal, or less representation in student government than the independents?

Jim Smith, Liberal Arts junior—Representation in student government should be proportional to the numerical breakdown between Greeks and independents.

Betty Richter, Liberal Arts junior—I think Greeks should have at least equal representation in student government since most activities depend upon Greek participation. Actually, it doesn't make much difference whether a person is a Greek or independent, just as long as he represents the students.

Richard Smith, Education junior—Representation should be equal between the two groups because the interest the Greek show offsets the fact that they are in the minority.

John Heerey, Liberal Arts senior—Student government should be run by interested students regardless of their affiliation.

Sibyl Ingle, Fine Arts junior—Representation should be equal between the Greeks and independents because of the organization of the Greek houses.

Roger Doyle, Fine Arts sophomore—Independents and Greeks should have equal representation because most school support comes from Greek organizations even though they are in the minority.

Fred Haag, Liberal Arts sophomore—Representation should definitely be equal because the Greeks have earned it by their participation in campus affairs.

Fran Baker, Fine Arts sophomore—Representation should be proportional to the number of students in each group in order that

student government will be democratic.

Sally Howse, Liberal Arts junior—The independents should have more representation because the University as a whole has more independent students than Greeks. I think the independent would voice the opinion of the overall student body more accurately than the Greek who represents a select group.

Top Scholarship Recognition Goes to Tri-Delts, Betas

Alpha Chi Omega celebrated Hera Day recently. This is a day when they do something specially nice for others. The project for the group this year was to take children from the Wichita Orphans' Home to a movie and then back to the sorority house for some refreshments.

Tri Delts were seated in the order of their grade averages at the last meeting. There were six 4.0 averages in the sorority.

Sig Eps Hold Tourney
Sigma Phi Epsilon fraternity played in a basketball tournament this last weekend on the University campus. The tournament was among the six Sigma Phi Epsilon chapters in Kansas.

Junior Panhellenic will sponsor a bridge party for sorority coeds Sunday at 2 p.m. This will be at the Alpha Chi Omega house and all interested are welcome. The group will probably travel from house to house in the following weeks. Even beginners are urged to come and learn the fundamentals of the game.

Applications for AWS boards are due today. If interested, don't forget.

New officers have been elected at Grace Wilkie Hall. The officers are: president, Marilyn Hoagland; treasurer, Margaret Faulconer; first vice president, Alyce Groth; second vice president, Ruth Nichol; third vice president, Colleen Shannon; secretary, Lyndal Fowler; publicity chairman, Sara Pearman; AWS representative, Sandra Crella; parliamentarian, Martha Miller; historian, Marilyn Walder; WRA representative, Judy Bolinger; social chairmen, Anne Deschner and Joan Duggins.

New Officers Approved
Panhellenic council approved the succession of officers at a recent

meeting. Each year the vice president succeeds the president, etc. The new officers will be: president, Myrna Schenck; secretary, Allison Comstock; treasurer, Quincalee Brown; secretary, Carole Pierce; vice president, Betty Richter.

Women of Alpha Phi donated their time on Feb. 28 in behalf of National Heart Sunday. Members of the group canvassed several neighborhoods to collect funds for heart research. Cardiac Aid is the group's national philanthropy.

The first semester grade averages for sororities, fraternities and unaffiliated students were computed recently by Dr. Worth Fletcher, registrar.

The sorority with the highest over all grade point average is Delta Delta Delta with a 3.008 grade point.

The fraternity with the highest grade point average on campus is Beta Theta Pi with 2.400.

DG's, Sig Eps Second
These averages and those of other Greek groups and all-university averages were compiled through the effort of Dr. Fletcher. Part of the work was done by hand. The number of hours was computed and the credit points

averaged to complete the report. Delta Gamma had the second highest average with 2.989. Alpha Chi Omega, 2.719, was third; Gamma Phi Beta, 2.667, fourth; Alpha Phi, 2.597, fifth.

The fraternity with the second highest grades was Sigma Phi Epsilon with a 2.268. Delta Upsilon was next with 2.253, and Phi Delta Theta with 2.169.

The sorority with the highest average traditionally receives the Silver Tea Service from the dean of women. This set travels from group to group.

Pledges Receive Plaque
The womens' pledge class with the highest grade average is Delta Gamma. It will receive a traveling plaque. The average of the pledges this semester was 2.820.

The national groups will be compared with local chapters. The competition is quite keen. Delta Delta Delta also is carry-

ing more total hours than any other group. They have 911 hours with a total of sixty-two members. Beta Theta Pi has the greatest number of hours in the fraternities with 1,099 and seventy-eight members.

Beta pledges also had the high grade average with 2.421.

Greek Average Highest
The all-University average for first semester was 2.257. This is compared with the women's average which was 2.637 and the men's which was 2.055. The over-all Greek average was 2.552, well above the over-all University average.

Angel Flight, Army 'Blues' Travel to Colorado, Illinois

The Womens' Air Force drill team, Angel Flight, will take a bus trip to Colorado Springs, Colo. Thursday.

The trip is an annual pleasure occasion. Miss Natasha Matson and Major and Mrs. G. E. Funk will sponsor the group.

The Air Force Academy is in Colorado Springs and the coeds will take a tour of it on Friday. They will be honored by a dance the following Saturday evening. Saturday is left as free time.

The twenty-two girls will stay at the Star Ranch. Skiing facilities will be available.

The flight votes to decide where the trip will be. Last year the group chose Denver, Colo. The place must be within a 500 mile radius of Wichita. Three-fourths of the expenses are paid by Angel Flight and the minimum added charge by the individual girls. Extras are not included.

Sgt. Hanby will drive the bus. The coeds will be in uniform but will not march.

The Army Blue drill team will fly to Champagne, Ill., on Thursday.

The Pershing Rifles group will accompany them.

Both groups will march when they are there but only the Pershing Rifles organization will compete.

The meet is held annually for all Pershing Rifles groups and ratings are given to the best drill teams and performers.

The women on the trip will stay in the dormitory and in sorority houses on the campus of the University of Illinois in Urbana, a suburb of Champagne.

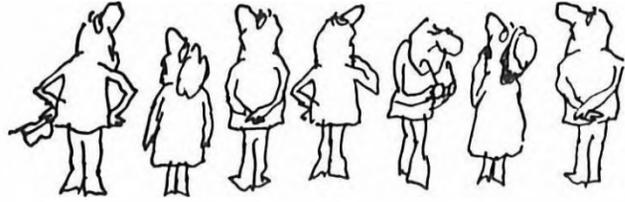

Mrs. Ann Fair and Mrs. Vera McCullough will sponsor the trip along with Sgt. Stevenson.

The plane furnished by the Army will seat about 90 people, 30 of which will be the coeds.

Use extra money? Join Sunflower advertising staff. Call Ex. 348 any afternoon.

Engineering Prof Asked to Write About Experiences While in India

BY PAT SMYTHE
Sunflower Staff Reporter

Every once in a while, people hear about the journalist or ex-general who turns writer. However, it's pretty unusual when an engineer takes up writing. But Assistant Professor William W. Zook, chairman of the industrial engineering department, has something to write about.

American Engineer, a monthly magazine published by the National Society of Professional Engineers, has asked Professor Zook to write an article about his engineering experiences in India.

Professor Zook has quite a bit to write about. In the latter part of May, 1952 he was informed by his company that he would be due to arrive in India within eight days. Within a few days he was in New York where he secured his passport and visa which ordinarily are obtainable only from Washington D.C.

Headquarters in India

From New York he flew to London, then to New Delhi, India, where he made his headquarters. Professor Zook's job was to represent his company and secure contracts for them to design and supervise construction of 4,000 miles of electrical distribution (power) lines and the 55 small power plants which were a part of the plan.

However, he wasn't certain about having a job. He still had to submit a proposal within the next eight days to the Indian government and this was to be done in competition with 17 other firms.

An engineering proposal is very much like a bid, but differs in the respect that it not only includes the company's price for the job, but contains the proposed plan for carrying out the job.

Tries Three Times

Professor Zook's plan was accepted by the government but the price was considered too high. Therefore the entire process of submitting proposals had to be repeated. Once more the price was too high. Finally after a third try, Professor Zook's proposal was accepted along with his price of \$10 million for the work.

Next, Professor Zook had to tour the area in which the work was to be done. The area, located in the Ghandi River Valley, was about 700 miles long and 200 miles wide in rough, desolate country. This was a part of the area being rebuilt by the Indian government

under the Four-Point Plan, and Professor Zook's company had to supply the power lines and stations to be drilled by the partner firm.

During his four-month stay in India, Professor Zook had a number of unusual experiences. Once, while on a long trip to inspect the Ghandi River area, he ran out of food and water and had to live on brandy for two days.

In touring the area he traveled by steam boat, plane, train, foot and motor rickshaw. Another time, while out in the field, he slept in an elephant barn, since it was the only place available.

Difficulties Arise

Professor Zook's work encountered several difficulties. The entire time he spent in India was during the monsoon season which brought six to eight inches of rain daily. Another problem was that of the power poles. In India, the wooden poles are useless since they do not have the necessary chemicals available to prevent the poles from rotting. This meant that something else had to be used in place of wooden poles. Finally, a method of welding rail-road

beams for use as poles was devised.

Upon arriving back in the United States in early October, Professor Zook immediately became ill with an Asian version of hepatitis (liver ailment) and spent 12 weeks recuperating in the hospital and at home.

Medical Science Club Newly Formed Group

The first meeting of a new club open to those interested in the medical and biological fields was held recently. The organization will be known as the Medical Science Club.

Meetings will be held at 8 p.m. the first and third Tuesdays of each month in Rm. 210, CAC, according to Nancy Lower, acting secretary.

Previously, one meeting was held, and the organization was open only to medical technology students. Now, the club will be expanded and is open to anyone preparing for a medical or biological profession, she said.

DONATION

(Continued from Page 1)
bonds to be issued by the University.

President Harry F. Corbin, who announced the University's current \$25 million development program in late 1957, declared:

"We are grateful to the families of Frank and Harvey Ablah for their wonderful expression of confidence in higher education, generally, and the University of Wichita in particular."

"Our present students, and all those in future generations, will benefit through enriched educational opportunities provided by their philanthropy."

President Corbin told the Regents that completion of the downtown structure would enable the University to begin construction of the library in 1961.

Income from the gift also will mean a substantial reduction in the student fee that will be necessary under the revenue bond financing planned for the library.

TUITION

(Continued from Page 1)
lifted, and a straight \$10 per credit hour rate prevailed. Last year the University changed its non-resident classification to include Kansas students living outside the local taxing area.

The increase in student costs has been under study by the University for more than a year. The University has been at the maximum of its taxing authority for four years.

LUCKY STRIKE presents

Dear Dr. Frood:

Dr. Frood, Ph.T.T.

Dear Dr. Frood: Would you please explain Einstein's theory of relativity in simple terms.

Physics Major

Dear Physics: Gladly. It is a theory. It is about relativity. It was thought up by a man named Einstein.

Dear Dr. Frood: I wear button-down shirts. I wear grey flannel trousers. I wear fine tweed jackets. I wear British-made shoes. I wear thin striped ties. But still I have no friends. Why?

Friendless

Dear Friendless: Your ties must be a trifle too thin.

Dear Dr. Frood: My sociology Professor says parents should be held responsible for juvenile delinquency. Do you agree?

Soc. Major

Dear Soc: Only if they are very young.

OBFUSCATED ENGLISH PROF. FAILS TO FOOL FROOD

(see below)

Dear Dr. Frood: Very soon the major corporations will be scouting the colleges for capable seniors. They'll be offering fabulous salaries, big titles, golden opportunities. Whom should I work for to guarantee myself a secure future and top income?

Capable

Dear Capable: Dad.

Dear Dr. Frood: Recently I saw this slogan for Lucky Strike: "Remember how great cigarettes used to taste? Luckies still do." I wonder if the Lucky Strike people realize there is a most serious obfuscation here. The modifier is awkward. Does "great" modify "taste"? Or does "great" modify "cigarettes"?

English Professor

Dear English: You can answer that one yourself. Simply put a match to a Lucky Strike and puff.

Dear Dr. Frood: For many months I have worked nights in the lab, developing the formula that I am convinced will make possible the perfect crime. It is a deadly poison that works externally, rather than internally. To test my formula, I have placed a large amount of the poison on this letter that you are now holding in your hands. Sorry it had to be you, old man.

Wolfgang

Dear Wolfgang: My secretary received your letter. Now that there is no one to care for them, I'm sending you her 14 cats.
