UNIVERSITY OF WICHITA, WICHITA, KANSAS

April 23, 1963

## Annual May Festival Planned for Friday

The 51st annual Hippodrome will be celebrated Friday and Saturday with the elimination of classes and a substitution of skits performed by students.

Nine student groups will present skits and filmed productions which they have written, produced, and performed themselves.

This year, two independent groups, the Independent Student Association and Trinity Productions, and seven Greek houses will present 30-minute programs. The Greek houses are Beta Theta Pi, Delta Delta Delta, Delta Gamma, Delta Upsilon, Gamma Phi Beta, Phi Delta Theta, and Sigma Phi Epsilon.

First and second place trophies will be awarded in the three divisions: independent, sorority, and fraternity. The trophies will be accompanied by checks for \$25 and \$15 for the first and second place winners.

A panel of five judges will rate each group's skit on the basis of points for originality, production, and performance. Judges will be Howard Ellis, head of the music education department; Dr. Martin Reif, assistant professor of history; James Ruoff, associate professor of English; Mary Jane Teall, assistant professor of speech and drama; and Richard Welsbacher, assistant professor of speech and drama.

Gene Cook and Glynn Barclay will emcee the day-long program, according to Tom Seigle, Hippodrome chairman.

Friday evening, May Queen Marya Heiger will be crowned, and her court will be presented. Barbara Moore will sing at the coronation.

Junior coeds, selected by the current members of Mortar Board, women's honorary society, will be "tapped" during the evening program, and the new members of the Men's Honor Five will be introduced.

The Sigma Phi Epsilon "Outstanding Sorority" trophy will be presented to the sorority selected for the honor. Last year's winner

was Gamma Phi Beta sorority. The Dean's Plaque will be presented to the sorority and fraternity pledge classes with the highest grades. Delta Delta Delta and Beta Theta Pi won the awards last year.

The Saturday Night Revue will include the two top skits in each division, and first and second place winners will be announced.

Kappa Kappa Psi, a band honorary, was awarded the first prize in the independent division in last year's festival.

Gamma Phi Beta presented a skit entitled "The Unbelievables" to capture the first-place trophy in the sorority division.

"Helen of Troy," a combination of a stage show and film produced and performed by the men of Phi Delta Theta, was awarded the first-place trophy in the fraternity division.

Students and the public may attend all of the Hippodrome festivities.

## Peace Corps Meet Slated

The Peace Corps State Conference will be held May 3 and 4 at the University of Kansas, according to Marshall Williams, campus Peace Corps liaison officer.

John D. Rockefeller, Jr., will be the featured speaker at the conference. He will speak on the future of the Peace Corps.

All interested students from the University may attend, according to Mr. Williams. Reservation blanks can be picked up in his office on the second floor of the CAC.

The CAC will help arrange transportation for those students who wish to go. The lodging at KU will be free for a limited number of students. For this reason, Mr. Williams urges that students get their reservations in early.

## EE Designs Speech Aid Researcher

A new research instrument, designed to help speech therapists gather data on the human voice, has been designed by the electrical engineering department.

The machine measures the maximum and minimum variations of the human larynx, according to Colon H. Dunn, chairman of the electrical engineering department. Known as the Fundamental Frequency Indicator, the machine not only measures but records in digital form, the fundamental frequency of speech every five hundredths of a second. The compiled information may then be fed directly to a digital computer for processing.

With this machine, the therapist can gather data on the human voice in approximately 3 minutes compared to approximately 16 hours by previous methods.

A group of senior electrical engineering students, under the supervision of Dr. Arthur T. Murphy, began the preliminary work on the project during the spring of 1961. Work continued through the spring of 1962 under the direction of William R. Ford, associate professor of electrical engineering, and Roy H. Norris, instructor in electrical engineering. During the summer of 1962, Norris completed the requirements for a master's degree by designing the complex switching circuitry required for the machine.

The instrument will be shipped to the University of Florida in May. Norris will train operators and participate in seminars on operation of the machine, in addition to giving instruction in instrumentation at the University of Florida during the summer of 1963.

## Corbin Tells Merits of Bill

President Harry F. Corbin told students Friday that "in my opinion, the integrity of this institution is guaranteed" by the merger bill.

"There is established a state university at Wichita—Wichita State University," he said, explaining the terms of the bill. "This is to the great advantage of all the young people in this part of the state."

The people of Wichita, who would otherwise pay a tax levy of 6 mills for the support of the University, would only be asked to pay a mill and a half in the future. This money would go to pay off the University's bonded indebtedness and to establish an endowment fund. The money obtained from the greatly reduced mill levy would not go into the general state budget, he declared.

"Tuition is very likely to be reduced markedly," he said. For the in-town student yearly tuition would drop from \$400 to \$250 for an average full-time load. Out-of-town students could expect a comparable drop in tuition, and at least a \$1,000 savings on tuition could be expected over a four-year period. Corbin pointed out that our own tuition would have gone up.

In reviewing the provisions of the bill, President Corbin declared that the clause which provides that additional doctorate programs will be developed in cooperation with KU was a real gain for WU. "This will make possible the development of Ph.D. programs here far sooner than our limited finances could have ever done," he declared.

He counseled "doubting Thomases" that expecting the legislature to guarantee every hoped-for provision is unrealistic in view of the nature of the legislative process. He said that we had done what we set out to do and that "the objective of establishing a state university in this area has been achieved."

President Corbin spoke at a convocation in the FAC Auditorium. He was introduced by Dave Leach, newly-elected SGA president. Sidney J. Brick, chairman of the Board of Regents, and two other Board members, Mrs. E. K. Edmiston and S. C. Brennan, were present.

Also participating were Sharon Richardson, 1961 Homecoming Queen and a member of Young Democrats; Merle Gates, state president of Young Republicans; and outgoing SGA president, Jim Allen.

## Panel Debates Bill's Value To University

A panel discussion designed to educate voters about the WU proposal by presenting opposing viewpoints was sponsored by the League of Women Voters last week.

Sidney J. Brick, chairman of the Board of Regents, told the group, "the full year will be needed to iron out all of the details. In July of 1964, the state will take full control." He added, "the budget prepared by the WU president and his staff will be routed to the KU chancellor, the state regents, and the House Ways and Means Committee. The president of the school will be appointed by the state regents. The language of the bill was carefully chosen. It is not mandatory that the regents follow the recommendations of the KU chancellor."

"The current WU regents will go out July 1, 1964, and will be established as a board of trustees," Brick said. "The trustees will administer current and future endowments of the school."

John Conard, Greensburg publisher and the Kiowa county representative who engineered the compromise bill in the Legislature, said, "The people here will have a better university. It is already an excellent school, but state support in this day and age simply can provide something better than is (Continued on Page 2)

## Engineering Run-Off Set for Thursday

A run-off election for Engineering representative to the Student Government Association will be held Thursday from 8:50 a.m. to 1 p.m. in the Engineering building.

All Engineering students and freshmen who will enter the School of Engineering next year are eligible to vote, according to Dan Tontz, election commissioner.

Anyone who wishes to help at the polls should contact Tontz.

## Co-Queens Crowned at Ball

CO-QUEENS of the Ball were Judy Broshears, Army, and Virginia Coleman, Air Force, escorted by Maynard Eaves and Larry Bachman.

The Army-Air Force ROTC's annual Military Ball was held Thursday night at the Cotillion Ballroom. Highlighting the affair was the crowning of co-queens by the two ROTC groups.

Judy Broshears was named Army Queen, and Virginia Coleman was crowned Air Force Queen. Other finalists for Army Queen were Sharon Kincaid, Jeanine Kopietz, Donna Raymond, Adel Schultz, and Bobbi Woodman. Air Force finalists were Carol Babich, Cindie Higgins, Carole Peterka, and June Woodman.

Decorations followed a red, white, and blue motif. Streamers were draped in to the center of the circular roof over the dance floor, and colorful spheres hung from the ceiling.

During the crowning ceremonies, the Scabbard and Blade drill team formed an archway with their sabers for candidates and their escorts to pass through. The co-queens were presented with bouquets of red roses.

Dress for the ball this year was more formal, with many cadets' dates wearing full-length gowns while others wore cocktail dresses. ROTC cadets were in uniform.

Lee Castle conducted the Jimmy Dorsey orchestra.

## Music School to Present Concerto-Aria, Recitals

The School of Music will present a variety of musical talents tonight and throughout the week.

The 14th annual Concerto-Aria Concert will be presented at 8:15 p.m. today in the FAC Concert Hall. This unusual program will feature nine graduate and undergraduate music majors as conductors, and eleven music majors as soloists.

Conducting will be Carolyn Crawford, Richard Griffiths, Jack Graham, Robert Kneile, Robert Jones, Danny Duncan, Claude Powell, Mike Garrison, and Crandall Waid.

Soloists will be Myrna Janzen, viola; Lee Spann, tenor; Alan Hurty, clarinet; Celia Cox, piano; Lyndl Fowler, violin; Carol Rowles, violin; Priscilla Brown, violin; John Albersson, baritone; DeeAnn Brown, cello; and Jerry Felmlie, flute; and

Jane Robertson, cello.

Seven senior and graduate recitals are in the offing. Carol Rowles will present her recital on the violin at 8:15 p.m. tomorrow in the Fine Arts Center. Dennis Jackson, a baritone, will present his graduate recital at 8:15 p.m. tomorrow in the Fine Arts Center. At 3 p.m. Sunday, April 28, Rebecca Peterson will give her senior recital on the organ.

Four recitals are slated for Monday, April 29. At 2 p.m. Jane Reed, violin, and John Albersson, baritone, will be presented. Elizabeth Wilson, cello, and Larry Lindbladh, trombone, will be presented at 8 p.m.

# Everyone's Fight ...

At Friday's convocation, President Corbin praised the job University students who live around the state had done to promote merger for the University. But he added that the job was not yet done.

While almost everyone would welcome the drop in tuition that would come if WU became Wichita State University, most students ask, "What can I do to see that we go into the state system?"

This answer was provided at the convocation. What is done now to see that the people of Wichita approve the legislature's bill cannot be done by campus "big shots" alone. This is in everyone's interest, and it is everyone's fight.

If state merger is to become a fact, we will each have to do our part to see that one last step is carried out. Every one of us who is eligible must get out May 14 to vote. More than that, we must be prepared to "go to bat" for WU with our neighbors and other voters in the city.

Phoning committees are being set up to contact the people who voted in the last city election. Informal coffees will be organized across the city, where our friends and neighbors can talk about state merger with students and faculty. Bumper stickers will be distributed, and groups of students will be visiting shopping centers around town to pass out literature and to talk with shoppers.

The personal endorsement of the bill by WU students will go further than anything else to convince Wichita people of the vital need for its passage May 14.

First-hand contact is vital. To do this, we need many volunteers. Take the initiative, and contact Merle Gates. Do something YOURSELF to lower your tuition!

## P-t-P Plans Tour of U.S. For Students

The People-to-People program is currently planning a tour of the United States for several hundred European students.

These students will travel through the country and visit for several days in the major cities. "Their goal will be to sample life in the U.S. by meeting with and staying in the homes of American students," according to Joyce Allegro, chairman of the People-to-People organization on campus.

Although Wichita is not one of the major cities to be visited, it may be possible to arrange for some of the students to come here if housing can be arranged, according to Miss Allegro. Out-of-town students are especially needed to host a student in their homes.

The students would stay only three days in each home, and it is doubtful that any one family would have more than one guest during the summer. Special plans should not be made for the visitors as they are most interested in learning about the ordinary day-to-day events that constitute the home life of the average American family.

For further information, contact Joyce Allegro in Rm. 212 of the CAC from 1-4 p.m. daily, or pick up information at the table in the main hall of the CAC from 9 a.m. to 1 p.m. daily this week.

## Forms Due May 10 For Fall Teaching

Education students who plan to student teach first semester of next fall should turn in their applications at Rm. 205 of Jardine Hall by May 10.

Students may pick up the applications in Rm. 205, Jardine Hall at any time.

Two meetings have been planned to help orientate the student teachers, to help clarify their assignments, to give them information on proper procedures, and to introduce the student teachers to their specific college advisors. The meetings are scheduled for May 27 and August 27.

## PANEL DEBATES . . .

(Continued from Page 1) possible otherwise."

Ferd Evans, Wichita attorney and the member of the panel delegated to present the opposing viewpoint toward the bill said, "WSU will be an associate of KU. Starting in 1964 and every year thereafter, the budget will go to the KU chancellor for his recommendations. I might remind you that the power to control the purse strings is the power to control everything."

Vince Bogart, city commissioner, stressed that the development of the university as a state school would be important in promoting industrial growth in this area.

"The benefits that will come from this development through industry alone are as important as the money we will save in taxes," Bogart said.

## How Ford economy won for Tiny Lund at Daytona

The Daytona 500 is one of America's toughest stock car events. It measures the toughness, stability, over-all performance and economy characteristics of the cars that take up its challenge—in a way that compresses years of driving punishment into 500 blazing miles. This year mechanical failures claimed over 50 per cent of the cars that entered. That's why Tiny Lund's victory in a Ford (with four other Fords right behind him) is a remarkable testimony to sheer engineering excellence.

Lund attributed his victory in part to the "missing pit stop." He made one less pit stop for fuel than his competition—proving that Ford economy can pay off in some fairly unlikely situations!

Economy and the winner of the Daytona 500 might sound like odd bedfellows at first. Yet economy is basic in every car we make . . . yes, even the Thunderbird is an economy car in its own way. Here's what we mean . . .

Economy is the measure of service and satisfaction the customer receives in relation to the price he pays for it. It does not mean, however, austerity . . . you have taught us this. Americans want—and we try hard to give them—cars that are comfortable to ride in, fun to drive, and powerful enough to get out of their own way. Not many Americans want to settle for basic transportation. You see this in our sales figures—more than half of our 1963 sales are coming from the top of each model line. We're selling convertibles, hardtops, the jazzy cars . . . the bucket-seat, high-performance, luxury editions are going like hot cakes.

Yet for all the fun that people are demanding in their cars, they still are

very conscious of the element of thrift—of avoiding unnecessary expense. This is the kind of economy we build into every car from the compact Falcon to the luxurious Thunderbird.

There's a special economy, for instance, in Ford's freedom from service. Every car and virtually every wagon can travel 36,000 miles before it needs a major chassis lubrication. Other routine service has been reduced, too—because these Fords are simply built better—and of better materials—than ever before.

In its own elegant way, even the Thunderbird gives you economy. It will travel 100,000 miles or 3 years before you have to lubricate the chassis. Thunderbirds have a way of becoming classics—as a look at their remarkably high resale value will quickly tell you. This, too, is economy.

Once, long ago—before the arrival of the Income Tax—a wealthy lady was asked to comment on the solid gold plumbing of her latest villa at Newport. "So thrifty, my dear," said the dowager . . . "it will never, ever rust."

Economy then, is many things to many people. Whatever economy means to you, you're pretty sure to find it in a Ford.

America's liveliest,  
most care-free cars!

# Shocker Shenanigans

By LORRY BROSIUS, Society Editor

Warm weather and sunny skies have brought the Shockers out-of-doors for fun and food. It gets harder and harder to stay indoors, and finals get closer and closer!

Delta Gammas and their fathers played softball last Sunday before a picnic. Later, the girls serenaded them and the men retaliated with an impromptu version of "Let Me Call You Sweetheart."

Alpha Phi Judy Fuller was hostess at a barbecue for high school friends home for Easter. Guest couples were Linda Moor-man from Rice, and Kappa Sig Tim Cunningham from KU; Alpha Phi Barbie Wilkes, and Delta Chi Bill Lusk from KU; Linda Schlueter from Emporia State, and Merwin Brown from K-State; Alpha Phi Miriam Nath, and DU Phil Hengen from Michigan U.; and Judy's date, Beta Bill Hartong.

Tri Delta Alums held a Greek Week tea Wednesday for the collegiate chapter and special guests, newly elected presidents and vice-presidents of sororities, Miss Elizabeth Gane, assistant dean of women, and house mothers of the sororities and fraternities on campus.

Alpha Phis who safaried to Marcy Low's lake cabin last weekend for

with dinner and bridge. Those present included Mrs. Welch, Tri Delta; Mrs. Fredericks, Gamma Phi; Mrs. Earle, Brennen Hall; Mrs. Walton, Grace Wilkie Hall; Mrs. Jones, Phi Delt; Mrs. Mellor, Beta; Mrs. Steel, Sig Ep; and Mrs. Lowe, DU.

Sig Eps and their dates enjoyed lakeside dancing Saturday evening.

Monday evening Delta Gamma Sherry Ridgway announced her en-gagement to Jon Barnard.

Delta Gamma's Mother Gaines entertained other house mothers

(Continued on Page 4)

## FILLING A WELL-NEEDED GAP

Although my son is a college freshman, I am glad to say that he is still not too old to climb up on my lap and have a heart-to-heart talk when things are troubling him. My boy is enrolled at Harvard where he is studying to be a fireman. From the time he was a little tiny baby he always said he wanted to be a fireman. Of course, my wife and I believed that he would eventually grow out of it, but no sir, the little chap never wavered in his ambition for one minute!

So here he is at Harvard today taking courses in net holding, mouth-to-mouth breathing, carbon tetrachloride, and Dalmatian dogs. It is a full schedule for the young man, and that, in fact, is exactly what we talked about when last he climbed upon my lap.

He complained that every bit of his time is taken up with his major requirements. He doesn't have so much as one hour a week to sample any of the fascinating courses outside his major—history, literature, language, science, or any of the thousand and one things that appeal to his keen young mind.

I am sure that many of you find yourselves in the same scholastic bind; you are taking so many requirements that you can't find time for some appealing electives. Therefore, in today's column I will forego levity and give you a brief survey in a subject that is probably not included in your curriculum.

*He's still not too old*

I have asked the makers of Marlboro Cigarettes whether I might employ this column—normally a vehicle for innocent merriment—to pursue this serious end. "Of course you may, crazy kid," they replied kindly, their grey eyes crinkling at the corners, their manly mouths twisted in funny little grins. If you are a Marlboro smoker—and what intelligent human person is not?—you would expect the makers of Marlboro to be fine men. And so they are—wonderful guys, every man-jack of them—good, generous, understanding, wise. They are each tipped with a pure white filter and come in soft pack or Flip-Top box.

But I digress. We were going to take up a topic you are probably unable to cover in your busy academic life. Let us start with the most basic topic of all—anthropology, the study of man himself.

Man is usually defined as a tool-making animal, but I personally do not find this definition entirely satisfactory. Man is not the only species which makes tools. The simians, for example, make monkey wrenches.

Still, when you come to a really complicated tool—like a linotype, for instance—you can be fairly sure it was made by Homo sapiens—or else a very intelligent tiger. The question one should ask, therefore, is not *who* made the tool, but *what* did he do with it.

For example, in a recent excavation in the Olduvai Gorge a large assortment of hominoid fossils was found, all dating back to the Middle Pleistocene Age. Buried with the fossils was a number of their artifacts, the most interesting being a black metal box which emitted a steady beeping sound. Now, of course, zoologists will tell you that tree frogs make such boxes which they employ in their mating activities (I can't go into detail about it in this family newspaper) but the eminent anthropological team, Mr. and Mrs. Walther Sigafoos (both he and she are named Walther) were convinced that this particular box was made not by tree frogs but by Neanderthal men. To prove their point, they switched on the box and out came television, which, as everyone knows, was the forerunner of fire.

If there is anything more you need to know about anthropology, just climb up on my lap as soon as my son leaves.

© 1962 Max Shulman

The makers of Marlboro Cigarettes who sponsor this column, often with trepidation, are not anthropologists. They are tobaccoists—good ones, I think—and I think you'll think so too when you sample their wares—available wherever cigarettes are sold in all fifty states.

## Anchoresses Elect Officers

The new officers of Anchoresses have been selected, according to Mary Ann Wuller, public relations officer of the group.

Penny Patton will serve again as commanding officer, and Margo Looney as executive officer. Carol Mocs and Carolyn Apple will serve as ship's clerk and treasurer, respectively.

Rank leaders will be Marilyn Minor, Judy Watkins, and Barbara Wilkes. Carolyn Howe was selected as drill commander, and Patty Rosenberg as her assistant by the Men's Executive Committee at the Naval Reserve Center last month, according to Miss Wuller.

**real stopper**

Mennen Spray delivers 3 times the anti-perspirant power of any other leading men's deodorant. The fine spray mist gets through to the skin where perspiration starts. Deodorizes. Effectively. And works all day. Is it any wonder more men use Mennen Spray in the handy squeeze bottle than any other deodorant?

# Hippodrome Tradition Clarified

By BILL RAPPS, Feature Editor

The freshman student might be puzzled by the question, "What is Hippodrome?"

Playboy magazine recently defined college as the fountain of knowledge where young scholars come to drink. Hippodrome might also be symbolically described as the valve that starts and stops the fountain where our own scholars drink.

Formally, Hippodrome is two days of amateur theatrics put on by students and directed toward campus satire. In other words, Hippodrome is a weekend mud-slinging contest.

As are most collegiate activities, Hippodrome is very intellectual in its content. Many of the organizations put on shows that are masterpieces of originality and organization. Some of the prop lists for the performances look like the inventory of a Macy's store, but other groups maintain a simple procedure and usually lose.

The skits are graded on originality, continuity, and production. Of course, without a censor, there is plenty of originality.

The big thing this year seems to be filmed scenes. Many of the Greek houses already have production men, camera cars, and shooting schedules. They take scenes like onrushing locomotives and label them "Homecoming Game."

There are other things besides skits at Hippodrome. There is usually some cultural entertainment, plus the crowning of the

May Queen, and the tapping of The Greeks work like dogs for months and, in one final burst of exhaustion, put their own brand of original entertainment on the Commons Auditorium stage during two days of festivities. Everyone works until they drop, and then, after it's over, they all go home and sleep.

The Sig Eps also award their trophy to their choice of the best sorority. The University usually supplies an emcee with a quick wit and a pleasing smile for the audience to shout down.

So this is what Hippodrome is. it off.

## Film of Peru To Feature Ancient Ruins

A color film telling the story of the Quechua Indians of Peru, direct descendants of the Incas, will be featured at noon tomorrow on Reel Time in the Audio-Visual Center.

This film, "Children of the Sun," takes the viewer through the ancient ruins of the Inca world, observes customs that have been handed down to their grandchildren for many centuries, and travels through the streets of the Lost City.

"Canyon Country," a travelogue showing a canyon rock formation in color, will also be shown at this time, according to Mrs. Carol Holman, coordinator of audio-visual services.

A narrator tells how a huge plateau seven times submerged under prehistoric oceans, finally rose to form the eight-mile wide gorge. Also shown are the Petrified Forest, the Painted Desert, and a trip along the Colorado River.

## AWS Posts Open

Applications for positions on AWS Council must be turned in by noon today at Student Services, Rm. 113 Jardine Hall.

Positions are open for both unaffiliated and Greek women, according to Linda George, vice-president.
