WSU Managed Data Systems for Analysis and Reporting

Office of Planning and Analysis (OPA)

BIPM UAD ERD

Office of Planning and Analysis

The University community has three managed data systems from which to obtain information related to data for decision-making, planning and reporting. Depending on the type of information needed, these data systems are:

- Business Intelligence and Predictive Modeling (BIPM).
• University Assessment Data (UAD).
• External Reporting Data (ERD).

BIPM and UAD data are used to provide reports and analysis for internal decision-making and strategic planning. ERD are data used to report to external entities such as the Kansas Board of Regents or IPEDS.
