Legacy Master Classrooms

The older Master Classroom design created the standard, and updated classrooms from the original ad-hoc MRC built classrooms. There are still many of these in use today, **but we update them to the current standard whenever funds are available.**

Standard Features: ADA height-adjustable lectern, resident PC (Windows), DVD player (some have Blu-Ray or VHS players), document/demonstration camera for physical media, full-size HDMI and VGA+Audio cables for user's laptop/tablet/phone, etc., confidence monitor. Also includes projector(s) or display(s) of appropriate size, plus appropriate speaker coverage for voice and video playback, with push-button controls.

Optional Features: Some existing rooms have lapel microphones for voice amplification, some have dual displays (independent). We will not be adding additional features to legacy Master Classrooms. Current Examples: Jabara Hall 127/128, Hubbard Hall 208-211.
