

PROFS TO ENTERTAIN STUDENTS

Reveal Dates for Pictures

Yearbook Photos Will Be Taken Downtown

With editorial work on the University yearbook falling into full swing with the beginning of the semester, the photographing of the 1935 Parnassus yearbook is well advanced. It was announced last night that all pictures will be taken at the Sun Studio, 108 1/2 West Douglas, according to Clifford Booth, business manager of the University yearbook. The student will be asked to pay twenty-five cents for the Parnassus will pay twenty-five cents to cover the expenses associated with the photographing.

Each student has been assigned a date for the taking of his picture. No definite hour has been set and students may appear at the studio at their convenience. It was stressed, however, that students falling to appear on the day of their assignment will be asked to pay an extra amount.

It is to be admitted that it would be much more convenient to have pictures taken on the campus, Mr. Booth last night, "but we have been able to cut the cost in by adopting the present arrangement. We hope the Shockers cooperate in making the book all-student affair."

The definite schedule will be published next week in the Sunflower as well as being posted on prominent bulletin boards. In addition each student will be called by phone just the day before his appointment.

Print 1300 Books
Outline work on the yearbook is being rushed along as rapidly as possible under the direction of Ed Thomas, editor-in-chief. Although it has often been a task in the platform of the staff to publish the Parnassus early, we are to fulfill our promise this year in our announcement May 13 as our line," said Mr. Thomas last night.

It is not making any surprise promises in regard to the book's contents, he continued. "The 1935 Parnassus will be the best that can be published under the current conditions."

Approximately thirteen hundred copies of the yearbook will be distributed through the press. Students who attended school the first semester but who will not be enrolled next semester will be entitled to a copy upon the payment of an additional dollar.

Snapsheets Due Feb. 8
The feature section of the yearbook is being prepared by the staff and a complete detailed layout of the entire book will be prepared by the end of the month.

Students working in the departments include Jimmie H. Brown, associate editor; Bernard Ing, art; Stanford Waddell, Joe Stone, sports; Miss Marjorie Hayes, organizations; Miss Mary Gerlach, pictures; Max Soderstrom, faculty; Max Soderstrom, fraternities; Miss Natalie Sororities; Miss Jean Van Sale, women's athletics; Loy L. Murray, military training; Miss Mary Gerlach, fine arts; Miss Mary Harvey, features; and Paul Wall, photography and snapshots.

has been pointed out that any student desiring a group picture in the Parnassus should send representative to Mr. Booth at that financial arrangements completed.

shops in the kodak corner for the month of January will be Friday, Feb. 8.

Another Truckman

Just another truckman will be the classification of Prof. S. W. Wright when he appears along with several other faculty members in the play, "To the Ladies," to be given next Thursday and Friday nights.

Street Cars To Be Discontinued

City Commission Passes On Ordinance Modernizing Transportation

An ordinance to replace street cars with modern buses and fix a standard rate of 5 cents for fares was passed by the City Commission Monday night in an effort to modernize Wichita's transportation system.

Isely, director of publicity at the University, was a member of a delegation of College Hill residents who spoke at a recent meeting of the city Commission in support of the proposed ordinance.

This group, composed of Fred Williams, John Stinson, J. Murray Harris, Frank Schroeder and Mr. Isely, declared that persons who opposed the passage of the ordinance and advocated the voting of \$300,000 in bonds for a municipal bus system are, in most instances, automobile users and not regular patrons of the city transportation system.

Data concerning municipal ownership of the system was presented to the commission by H. J. Toetzel, president of the taxpayers union, and by Harold Malone, secretary of the union and president of the University Alumni Association. Groups attending the meeting represented the Wichita Chamber of Commerce, the Wichita Business and Professional Women's Club and persons of the numerous residential sections of the city.

Former President To Visit Campus

The Reverend Walter Rollins, president of Fairmount College from 1914 to 1922, will be a campus visitor next week.

Reverend Rollins will be the guest of Walter Henrich, a graduate of Fairmount, and prominent alumni of the University.

A dinner is being planned by the alumni in honor of Reverend Rollins. Mr. Carnot Brennan is in charge of the dinner.

Reverend Rollins laid the plans for Fairmount College to become a Municipal University.

Former President Is Campus Guest

Dr. Walter H. Rollins, former president of Fairmount College and present superintendent for New York State of the Congregational Churches, returned to Wichita January 24 for a visit with friends and acquaintances.

Dr. Rollins is recognized as an authority in his field throughout the United States. It was he who, in 1922, laid the plans that were put into effect when Fairmount College became the University of Wichita.

In interviews during his stay, Dr. Rollins expressed surprise at the growth of the University and praised its program of expansion.

Dr. Rollins paid a tribute to trustees and patrons of Fairmount, who aided in keeping the college alive during the time of his presidency, from 1914 to 1922.

He left Tuesday for Tulsa, where he will visit with Col. Oscar W. Hoop, former commandant of the University R.O.T.C. unit and now police commissioner at Tulsa.

Campus Road Work Started

Surveyors Start Work On the Proposed Project

School officials declared last night that it is only a matter of time when sufficient money will be available to finance the paving of a large portion of campus roads.

Approval of the paper filed January 9 has been somewhat delayed because additional demands have been placed upon the school's application for a government loan that were not anticipated when the application was made.

Elliott Confident
Roy W. Elliott, comptroller, declared late Tuesday that county officials are complying with the requests as rapidly as possible.

"Government approval of our application for a loan seems not only to be a matter of time," stated Mr. Elliott.

The sum of \$25,234.10 is the estimated cost of the proposed project. The University will spend \$2,300.10 of its own money for the improvement.

As soon as sufficient financial support is assured construction work will begin immediately to pave with the best concrete material a stretch of road beginning at the Hillside entrance of the campus, extending east to the Science Building, north to the parking lot and straight east to Yale. Surveyors have been working for the past two weeks on the proposed project.

Completed in Summer
As funds are made available the process of completing the hard surfacing of the remainder of the roads will take place this summer. It would be impossible, even if sufficient funds were available, to pave all the roads while school is in session, officials point out.

The Sunflower, in supporting the "better roads" drive, will publish an early date a facsimile of the new official road layout, declared Hite Taylor, editor-in-chief, yesterday. The layout was drawn up by P. L. Brockway, city engineer, and approved by Mr. Elliott.

U.S. MEN RATE HIGH
Fraternity men at the University of Southern California had the highest West of the Rocky Mountains, it was revealed today.

Wichita Beauty Winner Will Greet President Roosevelt

Privilege of personally greeting the nation's chief executive will be the honor accorded to the winner of the beauty contest to be held as a special feature of the President's Birthday Ball to be given here Wednesday, Jan. 30. The award will be made by five judges, one of whom will be a University student.

Every girl in attendance at the ball, to be held at the Lansen Hotel and the Elks' Lodge Ballroom, will be given an equal chance for the beauty honor. Although plans concerning the contest have not been released, it is expected that the winning girl will personally present a check for 30 per cent of the proceeds to President Franklin D. Roosevelt, as Wichita's substantial contribution to the aid of infantile paralysis victims.

Flying to Washington, D.C., in a chartered Walter Beech airplane, the winning contestant will give to the President a beautiful plaque dominated by a Kansas Sunflower and a Wichita-built airplane. Striking the idea of Wichita as the aviation center, the words, "Pioneering Spirit," will be inscribed at the bottom of the plaque.

Although plans for the selection of judges have not yet been announced the committee will probably consist of one boy each from the University of Wichita, of Friends University, Wichita High School East and Wichita High School North. The wife of a prominent member of the Elks' lodge will probably be selected to form a fifth member of the committee.

This affair, celebrating the President's fifty-fourth birthday, will no doubt be one of the most brilliant affairs of the social season. Capacity crowds are expected to fill the city's leading ballrooms as hundreds of Wichitans plan to celebrate the colorful event, which attendance figures show, is finding increased popularity each year.

'You're A Liar!'

With many dynamic adjectives being added, one Shockers student this week was called a liar more than once by his friends when he gave them the correct answer to the following question:
If a hundred feet were added to a wire stretched tightly around the earth, would the wire then stand more or less than an inch away from the earth's surface? (Assume that the earth is perfectly round.)
When you are given the correct answer, you too, will be ready to rail the submerged Shockers a liar. Make your guess without the use of pencil and then turn to page two for the answer.

Scholarships To Be Given

Several Now at Disposal of Northwestern U. At Chicago

Northwestern University Graduate School of Chicago and Evanston will have at its disposal scholarships and fellowships carrying stipends up to \$600 for the year 1935-36, according to news recently received at the Graduate School offices of the University.

The following fellowships and scholarships will be given:
Fourteen University Fellowship—\$300 to \$600 and tuition.
Friends of American Writers Fellowship in American Literature—\$300 and tuition.
Harris Fellowship in Political Science—\$300.

Two Catherine White Scholarships—Tuition.
Grant Scholarship in Geology and Geography—\$150 and tuition.
Harris Scholarship in Political Science—Tuition.
Various University Scholarships—Tuition.

The University also has fellowships available for persons seeking purely professional study in commerce, dentistry, education, journalism, medicine and speech.

Graduate assistantships are available from time to time in the following departments: botany, chemistry, mathematics, philosophy, physics, political science, psychology, romance languages and zoology.

Application must be made by March 1, 1935.

All-Star Cast To Give Play

"To the Ladies" Will Be First Faculty Production

Members of the faculty of the University of Wichita will present the play, "To the Ladies" on Thursday and Friday nights, Jan. 31 and Feb. 1, at 8:15 p.m. at the Henrich Auditorium. This is the first play ever to be presented by an all-faculty cast at this University.

George S. Kaufman and Marc Connelly, authors of the play, are two outstanding writers of modern drama. Mr. Kaufman became famous for his play, "Of Thee I Sing," which was a Pulitzer prize winner two years ago, while Mr. Connelly is the author of "Green Pastures."

Domestic Comedy
In speaking of the play George Winler, who is directing it, says, "I am sure everyone will enjoy this production, especially those who have to contend with the officials of a business concern in order to make any advancement."

Members of the cast for "To the Ladies" includes:
Elsie Beebe Marcella Oberg
Leonard Beebe Carl England
The Stenographer Laura McMullen
John Kincaid Lloyd McKinley
Mrs. Kincaid Jacquetta Dewing
Chester Mullin Hugo Wall
Tom Baker Cyril Grace
A Truckman Eldor Marten
Another Truckman S. W. Wright
The Toastmaster Clayton Staples
The Politician Edwin Bello
The Barber Kurt Seppner
The Bootblack Samuel Wolfy

The illumination of the stage has been greatly improved by the addition of three new spot lights. Two are eight inch lights and the other is a six inch light. These lights which will light the whole front of the stage are a great improvement over the footlights and are to be operated from a switchboard. The installing of these lights cost over a hundred dollars and the work was done by Eugene Spangler, John McComb and Phil Pennington.

Freshmen Election Will Be February 7

Freshmen will hold a class election in the auditorium on Thursday, February 7. Dick Price, present leader, will conduct the election under the auspices of the Student Council.

The officers that are elected at this time will serve for the remainder of the school year.

The election date was set by the Council in their regular meeting held last week. At this meeting the Council appointed Dick Jones as chairman of the committee to invite students and draw up a plan to present the Board of Regents concerning the addition of 50 cents to the activity fee for free varieties to be held here.

The Council aided in the street car franchise with petitions circulated upon the campus.

Stockton, Calif., Jan. 23—Stanford H. Holley, 21, student of the College of the West, blew his head off with a shotgun last week.

Big Parnassus Fashion Revue Will Be Leading Social Event of Spring

Photographer Starts Taking Pictures Monday

With the announcement of the 1935 Parnassus picture schedule today, editors of the student yearbook rolled up their sleeves in preparation for more than three months of strenuous work, during which time the best annual possible under the current budget will be published.

Dates for taking the pictures, revealed for the first time, this morning, will open the rush of activities at the Larson Studio, 108 1/2 West Douglas, where appointments will be filled with a substantial saving of money made to the students. The first set of photographs will be taken next Monday, Feb. 4.

Can't Miss Appointment
Students are urged to go downtown to the studio on the day of their appointment as scheduled. Although no certain hour has been set, it is expected that each person be responsible for having his picture taken on the specified date.

"Students must be photographed on the day of their appointment but are at liberty to go any time during that day. The variations of each student's schedule has necessitated this plan," declared Edwin Thomas, editor-in-chief of the student yearbook.

It was learned late yesterday that all students will be called by telephone on the evening immediately preceding their appointment. This will be done so persons desirous of

Each student has already invested his money in the 1935 Parnassus, and it is to his advantage that he have his picture taken to be used in the publication," declared Mr. Thomas.

Parnassus editors point out that approximately 1,300 books will be distributed. Students who have attended school the first semester, but who are not enrolled this semester, will be entitled to a book upon the payment of an additional dollar.

Immediately after student pictures are taken, work on page layouts will begin, constituting preliminary steps to the actual printing of the book.

New Road Plans

Construction work on the new layout of campus roads pictured above will begin as soon as the application for \$25,234.10, estimated cost of the paving project, meets with government approval. It is hoped a large portion of the proposed project will be completed by spring. This drawing, made scale size, was taken from the official blue prints made by P. L. Brockway, city engineer, and approved by Roy W. Elliott, comptroller. Plans have been formulated to pave with the best concrete material a stretch of road beginning at the Hillside entrance of the campus, extending east to the Science Building, north to the parking lot and straight east to Yale. Mr. Elliott stated that as funds were made available the process of completing the hard surfacing of the remainder of the roads would be made this

summer. University officials said that it would be almost impossible even if sufficient funds were now available, to pave all roads while school was in session.

Landscape will play an important part in the above road layout. The old parking lot will be eventually abandoned as well as the stretch of road between the Science and Administration Buildings. Beautiful lawns and shrubs will predominate. The new paving will be so laid as not to conflict with water lines that will be put into service as additional buildings are eventually added to the campus. The University will spend \$25,234.10 of its own money for the project.

THE BUILDING of a great university requires an outstanding newspaper to record its gains and achievements.

Alpha Gams Knocked Off By Indians

Websters Defeat U. Men To Take Lead

University Men	1	2	.333
Band	0	2	.000

With two field goals in the last few seconds of the game Ed Morrison saved the day for the Websters and enabled them to beat the University Men, 19-18, in the first contest of last night's round of the Intramural Basketball tournament.

The game was close all the way with the Websters holding a slight lead at the half. However, the University Men staged a come-back and were leading by 3 points in the final stages of the game when Morrison pulled his sensational stunt to put the Websters out in front.

Pirates Victorious
The potential man power of the Pirates finally got to clicking last night, enabling them to take the Barbs, 23-18.

The game was rough and fast with the Pirates leading all the way. The Barb game fizzled out in the second half, leaving the Pirates complete masters.

Barbs forward, was high scorer and set a tournament record for individual scoring with 13 points. However, with several new men in the ranks, his team mates could not give him the support he needed.

Phi Alphas Victors
The Band staged an upset by staying in the running with the Phi Alpha Pi boys, although in an overtime period the Phi Alphas had what was needed to eke out a 25-24 decision.

Nothing exciting happened in the game until the closing minutes. The Phi Alphas led all the way by a small margin which was tied up just before the gun. In the overtime period Rip Willis, Phi Alpha, jammed through for a set-up and then fouled Parcher who made one of his free tosses. That foul was Willis' fourth, and he was benched.

Parcher committed a foul shot, but the Band had no substitutes. Through the courtesy of Paul Randle, Phi Alpha captain, he was allowed to finish the game, however.

Indians Defeat Gammans
The loop leaders, Alpha Gams, were knocked off by the Indian team after having led all the way. A quick field goal each by Lorenzo McClain and Quannah Fields in the final stages of the game put the Indians in the lead and settled the hash for the Gammans.

The game was fast and well played until the last few minutes when caution was thrown to the winds and discord prevailed.

Wednesday, Jan. 23—15 Rifle
6:00 Orchestra

I. M. Announcement And Schedule

Coach Lindsey W. Austin announces the postponement of the fourth round of intramural basketball until after the final examinations. All teams will resume play on Wednesday, Feb. 6, with the following schedule:

7:00—Pirates vs. Band
7:00—Alpha Gamma Gamma vs. Phi Upsilon Sigma
8:00—American Indians vs. Men of Webster
10:00—Barbs vs. Colored All-Stars
Pi Alpha Pi vs. Bye

Shockers Take Good Beating In Rough Game

Collapse of Wichita In Last Half Spells Downfall

In a war-like cage battle which resembled almost any game other than basketball, Southwestern College Tuesday night handed the University of Wichita a most decisive licking in the Wheatshockers' first game of Central Conference competition this season. The final score was 41 to 26.

The game apparently ended at the half for the locals. When they went back on the floor at the opening of the second period the score stood in their favor, 18 to 15, but their total of 10 points during the rest of the contest went unnoticed beneath the barrage of Moundbuilder baskets.

Game Is Rough
Evidently hoping to give the Shockers fans something for their money, the Wheatshockers spiked the game with a rough and tumble affair which appeared unnecessarily rough. Comments about the officiating of John Wolf landed one player on the sidelines from where he acted as witness during the rest of the game.

Although the Shockers held the Builders under control for the first period, the loss of Rathbone and Powell, the latter going to the bench for four personal fouls in the first eight minutes of play, seemed to take the smoothness out of the Wheatshockers' play and kept them fighting desperately to hold the score down.

Gawthrop led Wichita's scoring with eight points and Rathbone trailed him closely with six. Most of their shots were of the sensational variety and helped greatly in holding the attention of the small crowd. As usual, Korhaus had tough luck on his long shots, several barely missing the scoring stage.

Winters Out of Game
Caywood, Southwestern center, was the scoring ace of the contest, registering 17 points after missing a flock of set-ups in the opening minutes of the game.

Red Winters, another Wichita center, watched the game from the sidelines owing to a slight attack of influenza.

The game ended with a parade of substitutes scrambling for possession of the ball.

Phillips Trims Shockers Again
Wichita Completely Outplayed By Superior Sooner Team, 30-18

It was just a case of too much Mr. Holt. For this reason the Shockers went down to defeat at the hands of Phillips University last Thursday night.

The afore mentioned Mr. Holt made exactly six field goals, all of them of the dizzy variety. He shot and passed; in fact he did everything an all-American could do, and it was impossible for any Shockers to guard the young man successfully.

Although the final score was 30 to 18 it does not tell the story of how badly the Wheatshockers were really beaten. The Haymakers throughout the evening passed the ball with uncanny accuracy and maintained complete control of the ball during the major portion of the game.

Wichita was forced to resort to long shots which simply refused to go in the hoop. None of their power plays worked as the Phillips defense was impregnable. Practically all the Haymakers' goals were either of the setup variety or were shot from close in to the basket.

For Wichita, Stewart, freshman forward, played a fine game and while scoring but one field goal played a bank-up game for the defense. Noble and Gawthrop also played a nice game of ball although they were not up to their regular form.

Reason For Attending College Is Important
ONE of the questions which appear on every set of college entrance examinations ought to be "Why are you going to college?" Were this vital question put into use at the University next fall when new students are entering, a most interesting survey could be made of the answers, not two of which would be alike.

In appealing to students for their ideas on the purpose of a college education, it would be enlightening to make the survey complete by submitting to new freshmen and to serious seniors alike the same question to be answered in all sincerity. What would be the transition between those two periods? What would have occurred in those four years to warrant the change of mind which would be evident in a great majority of those answers?

When shot up in rifle around in this wee pletely o sibles (h Jan 10 wouldn't some da miss!!! And agal Either way of e of a par to any to ball agid of Physical which wi week end All for a I it seen team is chile su skate, Ja which wi sharpest shooters t gather up will only Orchestra b

No lon announce, tered up I every 6h chest ha bulletin board—all their very own —And not even to be content at being on the same wall with the regular bulletin board in the women's gym they have moved across the hall—Orchestra members!!! henceforth the faculty left for all or information on when, where, how, and why.

Two volley ball games are scheduled with Friends University for next Tuesday afternoon at 2:30. One game will be between the freshmen of the two schools while the other will be between two teams made up of the upper classesmen. Following the games the W.A.A. of Friends will entertain the two teams at a tea—it must be some more of this friendly rivalry that we hear so much about!!!

Now that December winds have blown thoughts of Santa Claus out of our mind the intellectuals of the women's gym put their heads together and now pop up with this their latest sensational attraction—an archery Valentine Shoot and the target will be in the shape of a heart! Here's one time when any girl can pierce a heart—almost—that is—if she's got what it takes!!!

The University of Wichita is officially entered in a state swimming meet to be held in March, according to a statement made Monday by Miss Gladys Targart, director of women's physical education.

The meet will be in Wichita, probably at the Elk's Swimming Pool, and is open to the girls enrolled in the swimming class.

Events included in the advanced tests are: 40 yard crawl, 40 yard back stroke, 40 yard breast stroke, 100 yard free style, and 100 yard breast stroke.

The Sunflower

Published by students in the department of journalism at the University of Wichita, on the press of the Wichita Eagle.

Entered as second class matter, September 24, 1916, at the postoffice at Wichita, Kansas, under the act of March 3, 1879.

The Sunflower is a weekly newspaper published Thursday of each week during the school year. It is one of the oldest student publications in the state, being founded as a monthly publication in 1879 and published as a weekly in 1907.

Member of the Central Conference Press Association and of the Associated Collegiate Press.

'Kingfish' Long About Ready For Big Splash
CAN Huey Long, dictator of Louisiana, be slipping? Apparently he is if the latest press reports can be credited.

Tired of the absolute rule of this unenlightened phenomenon various groups of the state are organizing to overthrow their ruler. None is yet strong enough to openly challenge the "Kingfish" on his own grounds. Consequently, a decision may not be rendered until next election time. But if these progressive groups will unite, they may do much to undermine the foundations of the Long machine.

There is one grave danger from such organizations. That is their weakness for straying from the objective. Under the canny hands of communistic leaders more harm may be done by such organizations than that done by the Long machine. Under the spirit of mob law many regrettable situations are possible. Active resistance and bloodshed can defeat the whole objective.

However, if they maintain a standard of passive resistance and keep moving a whispering campaign, they probably will succeed.

Most of the reforms in national and state governments were first proposed by just such groups and later put into effect under the banner of the Donkey or the Elephant.

As a snowball gains in size as it rolls down hill, so may these opponents turn public opinion against Senator Long.

Short Pants
By LOY WOOD
One lorned every minute: Velmo Johnson of Rose Hill was driving home one afternoon, when about five miles from home, he saw a comely young woman standing by a stalled car frantically wringing her hands. Blinded by charity and whatnot, Velmo stopped and asked if he might be of assistance. The c. y. w. desired that he push her car into town to the garage. He did and waited until the trouble, a minor one, had been repaired. When the bill was presented, the c. y. w. fumbled through her purse, and in a pitiful tone announced that she had no money. V. J. shelled out to the tune of nearly \$5. The c. y. w. promised to look him up the next day, but she hasn't.

Another: One afternoon Dr. Mikesell finished his work in the psychology office, closed his desk, put on his hat and coat, turned out the lights, closed and locked the door, and started down the steps when a violent pounding brought him out of his dark brown study. Turning around, he saw that he had locked a feminine psychology instructor in the office. Without a word he went back, unlocked the door, turned on the lights, and then went back down the steps.

And another—from elsewhere: During a final in a class taught by an instructor who violently objected to the girls putting on their complexions in his classes, a little gal in the second row pulled out her powder puff and started to work vigorously. He soon sided her and punned, "Miss Higginbotham, this is not a make-up test."

Alan Coffman, ace Sunflower sports scribe, is threatened with bodily harm for an item in his column last week which referred to the yellow shirts worn by the Alpha Gam basketball team. The Gams, the threathener, insist in no uncertain terms that the yellow shirts are not yellow, but are gold.

Reed Showing Map Collection

Students of Mathematics Make Charts and Graphs For Instructor

"Maps and lots of them," proudly related Prof. Cecil B. Reed, of the University of Wichita Mathematics department, as he displayed his new collection of maps and charts, made by his students.

The new charts consist of large graphs, six and seven feet by three feet, displaying the accuracy of large curves on the graphs.

That the students have worked very hard in the last year is evident in all the cupboards in the room. There are all the types of figures from the cardboard cubes and triangles, made by high students to the complex figures formed of soldered wire, carved wood, and combination string and steel or tin projects on which there appear to be hundreds of strings each one curved but each one forming right angles with another string. The collection was started two years ago and all projects undertaken must be left with the school. The object of having figures such as these is to display to the student, a picture that he would be unable to visualize without this aid.

For summarizing the important facts in present and future trig, the second type chart, which is as large as the other type, and contains a review of all important formula used in trig. The printing on these charts is large enough to clearly be seen all over the room.

Benefits from this type of project is two-fold. The school would otherwise have to pay money, and the charts come very high for this type work, and the students learn the idea of their subject from working on the drawings. In selecting the student to do the work, the better students are chosen and the work is done for extra credit. There is no compulsion to do this and it is certainly never used as a means of punishment.

The students are welcome to come to the classroom and look at the interesting projects, according to the instructor.

New Graduate Courses Given

Carnegie Institute of East Also Offers Several Fellowships

Graduate courses and fellowships are available to students at the Carnegie Institute of Technology, Pittsburgh, Pennsylvania, according to the announcement received at the graduate office of the University recently.

Graduate students are accepted in chemistry, metallurgy, coal research, metals research, and molecular physics research laboratories. Applicants for the master's degree are accepted in architecture, chemistry, engineering, mathematics, mechanics, metallurgy and physics in the metals research laboratory.

Teaching fellowships in physics, chemistry, metallurgy and engineering, and in the molecular physics research laboratory, with stipends from \$400 to \$600 and free tuition, are available. Fellowships under the auspices of the mining advisory board with research assigned in fuel technology carry stipends of \$500 and free tuition.

Fellowships in the coal research laboratory have a stipend depending upon the attainments of the appointee. Fellowships in architecture are available, granting free tuition for five year courses.

HOLDERS of the doctor's degree may be granted guest fellowships with the privilege of attending seminars and research courses and of carrying on research in the coal research, metals research, and molecular physics laboratories, and in certain fields of physics, chemistry and metallurgy.

Applications for fellowships should be received by the secretary of the committee on graduate instruction before March 25.

FAIRMOUNT PHARMACY

The Fairmount Pharmacy is ready to serve the students of Wichita University for another semester. We don't like to brag, but our record of continued service is one that is hard to beat!

It takes good things I make good things. Someone said that to the right aroma in a cigarette you must have the right quantity of Turkish tobacco—and that's right.

But it is also true that get a pleasing aroma from home-grown tobaccos, tobaccos filled with South sunshine, sweet and ripe.

When these tobaccos are all blended and cross-blended the Chesterfield way, balance one against the other, you get a flavor and fragrance that is different from other cigarettes.

Concert Draws Big Crowd at W.H.

Dean Thurlow Ljeurance presided at a concert at East High school Sunday before a crowd of approximately eight-hundred people, the extremely disagreeable weather.

The program consisted of a chakra playing many of the pieces and the orchestra and presenting several of Dean Ljeurance's own compositions.

Dean Ljeurance was assisting in the program with several pieces by Mrs. Beatrice Pease, violinist; Paul Ober, Roy Schuller, baritone; and quartette Munselle.

Jardine Appears As Guest Speaker

Fulfilling a busy speaking schedule during the past few days, President W. M. Jardine delivered the principal address yesterday at the annual meeting of the Butler County Farm Bureau in the Masonic Building at Eldorado, Kan.

The school head used as his topic the general phase of "Agriculture."

President Jardine gave a professional talk on schools and school problems as the featured address last Saturday to board members and Teachers Association, assembled at Central Intermediate School for their annual monthly meeting.

No talks have been scheduled for the coming week.

Word has been received here of the death of W. L. (Slim) Martin, former basketball coach at Southwestern College. Mr. Martin was killed when the automobile in which he was riding was struck by a train.

IT'S FULL OF DYNAMITE

Says WALTER WINCHELL

COULD IT HAPPEN?
A story so startling it's rather dare not give his name.

Here's the Answer?
Here is the correct answer to the question found on page one. If a hundred feet were added to a wire stretched tightly around the earth, the wire then would stand approximately 15.8 feet away from the earth's surface.
Just in case you want to check for an error, the circumference of a circle is equal to the diameter, multiplied by 3.14
